per
mille.

(1) Property not built upon :—

|---|----|
| (a) Lands, fields, vineyards, gardens, subject to tithe, or to the equivalent of tithe (Badal-ushur), or changed into land of the muqataa category .. | 4 |
| (b) Land destined for building purposes .. | 4 |
| (c) Lands not paying tithe, nor paying the equivalent of tithe, nor changed into muqataa land .. | 10 |

(2) Property built upon :—

- | | |
|--|----|
| (a) Farm buildings | 4 |
| (b) Farm buildings hired and occupied by tenants not exceeding 200,000 mils capital value .. | 5 |
| (c) Farm buildings hired or occupied by tenants exceeding 200,000 mils capital value .. | 8 |
| (d) Farm buildings within the area of a town or village .. | 5 |
| (e) Waqf buildings (mussaqaafat waqfiyeh) .. | 4 |
| (f) Houses inhabited by the proprietors, the value of which is below 200,000 mils .. | 5 |
| (g) Houses inhabited by the proprietors, the value of which is over 200,000 mils .. | 8 |
| (h) Buildings leased or rented by their owners .. | 10 |

Additions to this tax aggregating 41% on buildings and 56% on lands were made from time to time under Ottoman Decrees. These additions are still collected, except in the case of buildings and lands re-assessed since 1919. Immovable property registered in the names of corporate bodies is subject to an additional tax varying from 1/2 to 1 per mille of its assessed value ; but this tax was abolished with effect from 1st April, 1933.

In the townships of Haifa, Acre and Shefa Amr, a roofed property tax was levied in lieu until 1st April, 1932, when the Urban Property Tax was applied to Haifa and Acre. This tax is assessed at 3 1/3% of the gross income of buildings with the exception of farm buildings, which are exempt.

Exemption is granted in respect of the buildings of recognised Charitable and Religious Institutions and buildings and playgrounds owned and maintained by recognised Educational Institutions, provided the buildings are used solely for charitable, religious of educational purposes and are not revenue producing.

The Urban Property Tax Ordinance provides for the assessment of the net annual value of immovable property in urban areas with a view to the imposition of a tax to replace the House and Land Tax (Werko), the tax on buildings (Mussaqaafat) and Badal Ushur. The new tax is payable by the reputed owner of the property at such annual rates, not exceeding 15 per centum of the net annual value of house property and land, as may be prescribed for the various categories of property. The Ordinance also provides for a revision every year and a general re-assessment every fifth year.

With effect from 1st April, 1934 rates were imposed varying from 10% to 12% of the net annual value and the application of the Ordinance was extended to the towns of Shefa 'Amr and Khan Yunis. With effect from 1st April, 1935, rates were imposed at 10% of the net annual value in respect of all categories and the application of the Ordinance extended to the town of Beit Sahur, Hadera and Ramat Gan.

SECTION XI.

MUNICIPALITIES AND OTHER LOCAL BODIES

1 There are 23 Municipalities in Palestine, of which 10 are in the Northern District, 8 in the Southern District and 5 in the Jerusalem District. All Municipalities save that of Tel Aviv which was established in 1934 under the Municipal Corporations Ordinance, 1934, were created under the Ottoman regime and were governed by the Ottoman Wilayet Municipal Law of the 5th October, 1877.

2 The functions, powers and duties of Municipal Councils are now derived from and imposed by the Municipal Corporations Ordinance, 1934.

3 The Ordinance provides that the Municipalities existing at the time of its enactment and the Township of Tel Aviv shall become Municipalities and the High Commissioner is given power after consulting the views of the public concerned to establish more Municipalities or to abolish Municipalities or to vary the existing Municipal limits.

4 The Ordinance provides that the affairs of Municipal corporations shall be managed by elected Councils, elected by direct election. The qualifications of electors are as follows :—

- (a) Males of Palestinian citizenship (not applicable in the case of Tel-Aviv).
- (b) Not less than 25 years of age (in the case of Tel-Aviv not less than 21 years of age).
- (c) Not under disability.
- (d) Not to have been sentenced to a term of imprisonment of one year or upwards.
- (e) A payment within 12 months preceding the date of the preparation of the Register of Voters of tax to an annual amount of at least 500 mils on immovable property owned within the Municipal Area ; or payment of Municipal rates to an amount of at least £P. 1 ; or separate occupation of premises within the Municipal Area on which rates to that amount have been paid within the preceding 12 months.

Community rolls have been abolished. The High Commissioner is however given power, on the representation of a Council, to change the qualifications of electors.

5. The High Commissioner is given power at his discretion when it appears to him necessary in the interests of good government to nominate not more than two councillors to the Municipalities of Jerusalem and Haifa.

6. The qualifications for councillors are as follows :—

- (a) A place of residence within the Municipal Area.
- (b) Not less than 30 years of age (in the case of Tel-Aviv not less than 25 years of age).
- (c) A payment within 12 months preceding the date of the Ordinance of taxes of at least £P. 1 on immovable property owned within the Municipal Area, or of Municipal rates to an amount of at least £P. 2, or separate occupation of premises within the Municipal Area on which Municipal rates to an amount of at least £P. 2 have been paid within the preceding 12 months.
- (d) Not being an undischarged bankrupt.
- (e) Not to have an interest directly or indirectly in any contract with, by or on behalf of the Municipality.
- (f) Not being a paid officer of the Government or Municipality.

The High Commissioner is given power, on the recommendation of a Council, to alter these qualifications for members of that Council.

7. The Ordinance provides that councillors shall ordinarily be elected for the whole of the Municipal Area but the High Commissioner is given power when it appears to him desirable to divide a Municipal Area into divisions for the purpose of elections.

8. The Mayor and Deputy-Mayor are appointed by the High Commissioner from among the councillors and Councils are given power to set up committees to deal with various matters, upon which committees the District Commissioner may appoint an officer of the Government of Palestine as an advisory member.

9. If for any reason a Council expires before the due date or ceases to perform its functions, the High Commissioner may either order a general election to be held or nominate a Council or nominate a commission to perform the duties of the Council.

10. The Ordinance provides for the establishment of urban committees which will have power to approve additional expenditure, the funds for which will be provided by additions to the rates of the persons residing within the area concerned.

11. The Ordinance provides that the accounts of all Municipal corporations shall be audited by the Government Auditor and that estimates shall be approved by the High Commissioner.

12. The Ordinance provides for the establishment of a permanent staff of Municipal officers, and councils, with the approval of the High Commissioner, are given power to make regulations governing the conditions of service of such officials and the grant to them of pensions and gratuities.

13. Provisions are made with regard to contracts to be entered into by councils, and for contracts involving expenditure of more than a certain amount, councils must call for tenders.

14. The Ordinance empowers Municipal Councils, subject to the approval of the High Commissioner to raise loans secured on the properties and revenue of the Councils.

15. The duties and powers of councils are set out in the Ordinance in detail and they are given adequate powers to make, with the approval of the High Commissioner, by-laws to enable them to carry out those powers and duties.

16. The Ordinance provides for the imposition of rates, the municipal property rate being payable by the landlord of property and other rates being payable by the occupier of property. Special provisions have been incorporated to deal with persons occupying one or two rooms who are generally spoken of as "lodgers" who are made liable to pay to the occupier of the house in which they live a proportion of the rates paid by such occupier.

17. Provisions are included for the preparation of assessment lists and for appeals therefrom and for the collection of rates which are in arrear.

18. The Municipal Courts Ordinance, 1928, empowers the High Commissioner to appoint fit persons of education and standing to be Magistrates of a town. He may, on the recommendation of the Chief Justice, appoint as Chairman of a Municipal Court a Stipendiary Magistrate. Cases within the jurisdiction of the Court are tried by a bench consisting of not less than two members but the Stipendiary Magistrate may try any case sitting alone. The jurisdiction of these Courts extends to any offences against Municipal Regulations and Bye-laws or any offences committed in a Municipal Area which are specified in Chapter III Articles 254 to 265 inclusive of the Ottoman Penal Code or in the following Ordinances :

- (a) The Public Health Ordinance (No. 1). 1918 ;
- (b) The Road Transport Ordinance, 1929 ;
- (c) The Town Planning Ordinances, 1921-29 ;
- (d) The Intoxicating Liquors and Public Entertainments Ordinance, 1922, and
- (e) The Regulation of Trades and Industries Ordinance, 1927.

The Court is entitled to pass a sentence not exceeding a fine of £P. 5 or imprisonment for fifteen days or both these penalties.

Appeal from conviction by a Municipal Court lies to the District Court as of right where the sentence is one of imprisonment, and by leave of the President of a District Court where a fine has been imposed.

19. The revenues of Municipalities are drawn from the following sources—Municipal property rate varying to a maximum of 10% ,to be levied upon the property owner ; a general rate varying to a maximum of 10% ,to be levied upon the occupier ; an education rate varying to a maximum of 7 1/2% ; a sewage rate fees for licensing of stalls and booths and street traders, dogs, establishments selling intoxicating liquors, public entertainments, trades and industries, machinery, signboards ; fees for building permits, slaughtering of animals, leases, advertisements, and for specific services ; rents of Municipal property ; contributions for the installation of drainage and for the construction of pavements ; auction dues ; grants-in-aid from Government.

LOCAL COUNCILS.

The Local Councils Ordinances Nos. 1 and 2 of 1931, empower the High Commissioner on the recommendation of a District Commissioner by an order published in the Official Gazette to declare that any large village, quarter of a town having a distinctive character, or group of villages shall be administered by a Local Council.

The order may prescribe the composition of the Council.

Councils are invested with juristic personality, and may raise a loan secured on their property and revenues, with the approval of the High Commissioner.

Councils can levy rates on the property of the village or quarter with the sanction of the District Commissioner and may impose, also, a poll tax on the inhabitants and certain fees for licences or otherwise which are authorised by the Law of Municipal Taxation in force from time to time. The rates and fees which may be imposed or charged by any Council are set out in the Order constituting each Council. Under the Regulation of Trades and Industries Ordinance, 1927, a Local Council is given the same powers as a Municipal Council with regard to the regulation of trades and industries carried on within its area which affect public health and public security.

30. Local Councils have been declared in Palestine, 17 in the Northern District, 9 in the Southern District and 4 in the Jerusalem District.

POPULATION AND VITAL STATISTICS AND MIGRATION

(i) POPULATION

The first official census of the population of Palestine within approximately its present territorial limits, was taken on 23rd October, 1922, when the aggregate population of the country was returned as 757,182. Of that number 590,890 were Moslems, 83,794 Jews, 73,024 Christians and 9,474 Others.

Between 1922 and 1931 there took place a rapid increase in the population resulting from immigration as well as from natural increase. This immigration was largely due to the establishment of the Jewish National Home. In this nine-year period the aggregate population of Palestine increased to 1,035,821 recorded at the official census of 18th November, 1931, this population including Moslems 759,712, Jews 174,610, Christians 91,398 and Others 10,101. The rate of increase for the total population in this nine-year period was 36.8 per cent., the Moslems increasing by 28.6 per cent., the Jews by 108.4 per cent., and the Christians by 35.2 per cent. Thus the Jewish population of Palestine was more than doubled in these nine years.

The following table gives the census population of 1931 and the estimated additions to that population between the census of 18th November, 1931 and 30th June, 1935 (mid-year), by communities. While the natural increase in this period was rapid, immigration was the chief factor in producing an increase estimated at approximately 228,000 in the comparatively short period of a little over three and a half years.

HOUSING AND POPULATION

OCCUPIED HOUSES—HOUSEHOLDS

Persons per house and houses per square kilometre.

1. At the census taken on the 18th November 1931, the settled population of Palestine was returned as dwelling within 215,825 houses, yielding an average household of 4.5 persons. The definition of house for census purposes was not included in the legislation for the reason that it was desirable to gather experience of the local usage of the word in the vernaculars. The definition adopted was :—

“ House is the dwelling place of a commensal family with its resident dependants such as widows and servants. In exceptional cases it may be the enclosure or residence of one or more families having a separate entrance from the common way.”

The definition satisfied two needs in a country where household differs from town to village and from one community to another. The question has two aspects, the structural and the social. The structural aspect is statistically useless, but, in some villages, gives the only guide for control of enumeration. The social aspect not only facilitates control of the enumeration but is also statistically valuable in giving conceptions of the familial unit. The definition was, on the whole, satisfactory, but its application in certain areas showed a lack of understanding and, in some cases, of ordinary sense. In Tel Aviv and in some villages in Nablus sub-district a single man, having a bedroom in an ordinary house, that is, a lodger, was sometimes returned as forming a separate household. In other cases in Jewish villages of the communal types where large hutments accommodate a number of persons constituting, according to traditional European notions separate households, a few houses were returned as the residences of two score or more persons, no distinction being made as to the separate family arrangements, probably because the people themselves refused to make the distinctions. An examination of the statistics, however, reveals that the errors on one side tend to equilibrate the errors on the other side for areas that are larger than village units, so that the averages for sub-districts and towns may be taken as substantially accurate. The number of persons per occupied dwelling (separate) in England & Wales in 1921 was 4.85. A separate dwelling in England is not necessarily a separately constructed discrete building, but is often a house in which structural alterations permit of complete familial privacy. The question of definition in these matters is of the greatest importance, but, generally, there is a rough correspondence between the “ occupied dwelling ” of England and the “ house ” of Palestine as defined for the census taken in 1931. The comparison breaks down, however, when the number of rooms is taken into account. The average number of rooms per occupied dwelling in England & Wales 1921 was 5.14, whereas in Palestine it is considerably smaller. No statistics were taken at the census in regard to this matter, but the number of rooms available for a family, that is, an ordinary domestic household, does not, in all probability, exceed two.

Types of houses.

In the towns all types of house, from the dignified stone constructions built scores of years ago to the dignified and undignified detached residences and tenements built of stone or reinforced concrete and copied from European countries and purporting to satisfy European requirements, are found. Houses in the villages are constructed of the material found most easily. In the hill country, stone is employed ; in the villages of the southern part of the maritime plain, mud bricks are commonly the material of construction.

SECTION XXII.

CURRENCY, BANKING, WEIGHTS AND MEASURES, CANLEDARS, LANGUAGES

CURRENCY.

It was declared by Public Notice that as from the 22nd January, 1921, the following currency only should be legal tender in Palestine :—

Egyptian gold, notes, silver and nickel coins, and the British sovereign at the rate of 97.50 piastres Egyptian. No restriction, however, was placed on the circulation, in the ordinary course of trade, of coins of other currency at their current market rates.

The Order-in-Council dated the 7th February, 1927, Currency Notes Ordinance, 1927, and the Proclamation by the High Commissioner under Section 11 (2) of the Order-in-Council provide for the introduction of a Palestine currency consisting of coins and currency notes with effect from the 1st November, 1927. Other legislation relative to currency is contained in the Currency Substitution Ordinance, 1927, the Coinage Ordinance, 1927, the Bank Notes Forgery Ordinance, 1927, and the Coinage Amendment Ordinance, 1929.

A Currency Board has been constituted to provide for and to control the supply of currency, to ensure that the currency is maintained in satisfactory condition and generally to watch over the interest of Palestine as far as currency is concerned. The Board makes arrangements for minting of coins, printing of currency notes, and investment of the funds of the Board.

The Board authorises the issue of currency in Palestine against prepayment in London ; and arranges for issue, against currency tendered in Palestine, of drafts or telegraphic transfers payable in sterling in London.

The proceeds of the sale of coin and currency notes and all other revenue of the Board are, after the necessary deductions have been made for all expenses and for any contributions made to the revenues of Palestine, credited to a Currency Reserve Fund, and any losses which may be incurred are debited to the Fund. Any contribution to the revenues of Palestine is made after the Board and His Majesty's Secretary of State for the Colonies are satisfied that the reserves are adequate to ensure the convertibility of the currency and to provide a reasonable reserve against depreciation of investments.

The standard of currency is the Palestine Pound divided into 1,000 mils. The Palestine Currency Order provides for a gold coin of one Palestine Pound containing 123.27447 grains of standard gold (the equivalent of the English Pound) : it is not intended at present to introduce gold coins. Silver coins of 100 and 50 mils, nickel-bronze coins of 20, 10 and 5 mils, and bronze coins of 2 and 1 mils are in use. Silver coins are legal tender for the payment of £P. 2 nickel-bronze coins of 20 and 10 mils are legal tender for the payment of any amount not exceeding 200 mils, and coins of lower denominations are legal tender for an amount not exceeding 100 mils. Currency notes of £P. 100, £P. 50, £P. 10, £P. 5, £P. 1 and 500 mils are in use and are legal tenders of the amounts expressed therein.

The Currency Board is represented in Jerusalem by the Treasurer of Palestine and by Barclays Bank (Dominion, Colonial and Overseas).

Egyptian gold, notes, silver and nickel coins, and the British gold sovereign were by Proclamation declared not to be legal tender after the 31st March, 1928.

COMMERCE AND INDUSTRY.

During 1935, Palestine showed further economic development. Industrial undertakings which had been projected in 1934 were put into effect and many other new enterprises were established.

Among the more important undertakings established during the year were factories for the production of cooking stoves, bathtubs, flushing cisterns, metalware for constructional purposes, toilet soap, perfumery, edible oils, steel furniture, electric fittings, preserved fruits, vegetables and fish, whilst several smaller factories produced stockings and socks, bedsteads, knitted underwear, printers' ink, carbon paper, belts, braces and garters, tiles, furniture and fruit juices.

In the field of manufacture, almost all branches showed increased output. The output of tobacco factories increased from 747,645 kilos in 1934 to 909,684 kilos in 1935, intoxicating liquors from 3,477,953 litres to 4,222,328 litres cement from 143,000 tons to 187,000 tons, matches from 175,758 gross of boxes to 221,275 gross of boxes, salt from 9,389 tons to 10,376 tons, methylated spirits from 493,712 kilos to 593,307 kilos.

Factories manufacturing textiles such as hosiery, sweaters, bathing costumes, stockings and socks and other knitted wear showed an increase in production, as is apparent from increased imports of yarn during 1935.

The imports of cotton, woollen, silk and artificial silk yarn amounted to 952,168 kilos valued at £P. 176,534 in 1935, as compared with 812,112 kilos valued at £P. 165,173 in 1934.

Factories engaged in the extraction of oil from imported seeds and nuts for food and industrial purposes, also showed an increase in production over 1934. The following comparative table illustrates this :—

IMPORTS	1934		1935	
	Tons	£P.	Tons	£P.
Copra	1,489	14,470	1,923	22,979

TOTAL	18,517	170,220	23,484	208,395

The large number of companies officially registered during 1935 with the Government of Palestine under the Palestine Companies Ordinance, 1929, gives a fair indication of the economic progress of the country.

In 1935, 265 companies with an authorised capital of £P. 3,130,000 were registered, as compared with 170 companies with a total capital of £P. 1,700,000 registered during 1934. Among the newly registered companies, there were 78 with an authorised capital of £P. 10,000 and over, representing about 80 per cent of the total invested capital of these companies.

The following table shows the number and the authorised capital of these companies:—

No. of Companies	Authorised Capital £P.	Total £P.
1	400,000	400,000
1	250,000	250,000

1	12,500	12,500
1	11,000	11,000
22	10,000	220,000
Total	£P. 10,000 and over	£P. 2,658,500

The 1935 registrations included 10 banking houses and 28 institutions for the acquisition of land and property and the development of same. The remaining enterprises were industrial, shipping and transport, insurance, hotels and restaurants, and firms engaged in general trading.

Sixty-five companies increased their capital from about £P. 2,400,000 to £P. 6,000,000 during the year under review, while in 1934, which was also a year of great economic development, 30 companies only increased their capital from 340,000 to £P. 1,200,000.

Money brought into the country by immigrants, tourists, pilgrims and travellers continues to assist materially Palestine's prosperity. Immigrants to the number of 6,498 each possessing a capital of £P. 1,000 and upwards entered the country during 1935, as compared with 5,191 in 1934 and 3,267 in 1933.

The number of tourists, pilgrims and travellers in transit who entered Palestine during 1935 was 106,123, as compared with 91,823 in 1934 and 79,833 in 1933.

As a result of the steady economic development of the country the circulation of currency increased greatly. The following table shows the currency in circulation at the end of December, 1935, compared with previous years:—

Date	Currency in Circulation
On the 31st March, 1932	£P. 2,408,664
" " " 1933	" " " 2,821,664
" " " December 1934	" " " 4,069,664
" " " 1935	" " " 6,561,134

It should be mentioned, however, that as a result of the international situation which developed in the latter part of 1935, as a consequence of the Italo-Ethiopian conflict, there was a tendency to withdraw money from the smaller banks and deposits amounting to over one and half million pounds were so withdrawn in the month of September.

BUILDING ACTIVITY.

The erection of buildings, commercial and residential, to accommodate new immigrants and residents attracted from small towns and settlements to the more flourishing centres, continued without pause.

The approximate amount of money invested in building in thirty centres, including the four principal towns, totalled over £P. 8,000,000 in 1935.

The corresponding approximate total investments during the preceding four years was £P. 2,720, 678 in 1931, £P. 2,945,708 in 1932, £P. 5,600,732 in 1933, and £P. 7,002,268 in 1934.

Local producers and importers of constructional materials were fully occupied in supplying the needs of builders. The following table of imports of building materials illustrates this:—

	1931 £P.	1932 £P.	1933 £P.	1934 £P.	1935 £P.

Door & Window fittings*	19,000	20,000	40,000	60,000	69,510

* Figures in respect of 1931-1934 are approximate.

Due, however, to the stringent measures adopted by banks and credit institutions in the grant of credits to builders, resulting from the general international situation, building operations slowed down considerably and a sharp decline in the issue of building permits was noticeable during the latter part of the year.

CITRUS TRADE.

The export of grape fruit for the 1935/36 season commenced on the 1st October and the export of oranges on the 15th November.

The hot spell that prevailed during the latter part of April and the first part of May, caused considerable damage to the fruit and the 1935/6 crop was reduced by about two million cases.

Arrangements for advertising citrus fruit in the United Kingdom, the Continent, India, Ceylon and Canada, have been satisfactorily carried out.

Local arrangements for a juice drinking propaganda scheme were put into effect and the consumption of natural orange and grape fruit juice is increasing. This, it is expected will help in the disposal of considerable quantities of orange and grape fruit culls.

As from the 1st October, 1935, the advertising fee has been increased to 3 mils per case of citrus fruit exported.

6,878,911 cases of oranges and 888,793 cases of grape fruit were exported during 1935, as compared with 5,129,422 and 419,789 cases, respectively, exported during 1934.

Note.—The “ year of crop ” is the year in which the tobacco is planted. Thus the crop of 1934 represents tobacco planted in 1934 and registered in 1935. The cultivation of Heisheh is permitted in the Beersheba District only and is uncontrolled. Crops of Heisheh are therefore not registered.

The 1934 crop of tobacco shows a considerable increase over the three preceding years. The area planted in 1934 was 19,948 dunums compared to 9,778 in 1933. This extended cultivation may be ascribed to the fact that during the years 1932 and 1933 a considerable quantity of tobacco left over from the crops of 1929 (1,193,944 kilos) and 1930 was held by dealers and manufacturers and as this stock was disposed of the comparatively small quantity produced in 1934 fetched higher prices which encouraged extensive planting in 1934. The area planted with tobacco in 1935 was 22,294 dunums, a further increase in anticipation of the establishment of new factories in 1936.

The total importations of Tobacco both manufactured and unmanufactured during the last five years were as follows :—

IMPORTS.

The value of imports for home consumption in 1935, was £P. 17,853,493 an increase of £P. 2,700,712 over the preceding year.

The rise in imports was to a great extent due to the entry of immigrants with personal effects, implements and machinery and to the extensive importation of building materials and house fittings.

There were noticeable increases also in imports of seeds and nuts for expressing oil, cotton, silk and woollen yarn for use in the manufacture of knitted wear, animals for slaughtering, dairy products, fresh vegetables and fruits to suffice the needs of the growing population, industrial and agricultural machinery, wearing apparel of all sorts, benzine and kerosene and rubber tyres and tubes.

EXPORTS.

The value of exports of Palestine produce amounted to £P. 4,215,486 in 1935, an increase of £P. 997,924 over the preceding year.

The increase was primarily due to increased exports of citrus fruit which amounted to £P. 856,683 over 1934.

Exports of locally manufactured articles also showed an increase of £P. 73,967 over 1934, the increase being chiefly in respect of wearing apparel, stockings and socks, olive oil, soap, fruit juice and syrup and artificial teeth.

SECTION XXXII

METEOROLOGICAL OBSERVATIONS

DEPARTMENT OF AGRICULTURE AND FISHERIES.

The climate of Palestine is affected by the deserts of Arabia and Nubia to the East and South ; by temperate breezes on the west which bring rain from the south west ; and by the somewhat cooler conditions which obtain in the mountains of the Lebanon to the north. It is also varied by the diverse topographical conditions. To the south there are wide expanses of desert and sand dunes. The rest of the country falls rationally into three longitudinal zones—the maritime plain, which is comparatively warm in winter and humid in summer ; the hill areas of the central plateau which are cold in winter and have a drier atmosphere ; and the Jordan Valley, which has a high air pressure and is warm in winter and oppressively hot during summer. During certain periods the east wind, known as the “Khamsein” blows for several days at a time and has a decidedly dessicating effect. Snow fall occurs occasionally in the higher parts of the hill areas. Frost is rare and is not usually a serious factor though cases of damage to horticultural and vegetable crops sometimes occur. Dew fall is heavy during the summer months. Cloud bursts, which sometimes occur cause a good deal of soil erosion and damage to crops, orchards, and communications.

The following table shows the Temperatures and Mean Relative Humidity at ten Meteorological Stations for the years 1930 to 1935 :—

N.B.—The relative humidity at Jerusalem, Haifa, Beersheba, Gaza and Beisan is that recorded at 8h.

Rainfall is of vital importance and any reduction in the annual fall arouses concern for the prospects of agriculture and water conservation generally. The rain falls in winter and the summer months are entirely cloudless and without rain. The average yearly rainfall is 26 inches. The first rains which begin in September and continue through October and November are not generally heavy, but are sufficient for ploughing and seeding of winter crops. The principal rains fall during December, January, and February. The late rains which fall in March and usually end in April are of importance to the full development of the winter crops and greatly affect the amount of land sown with summer crops which reach maturity after the rainy season has ceased.

INSURANCE OF LETTERS

Letters may be insured at any Post Office except El Majdal for any place in Palestine or abroad which is admitted to the Insured Service. The maximum amount for which a letter may be insured in the inland service is £P. 120 but in the case of letters for abroad the insured value varies according to the country of destination. A letter may not be insured for an amount exceeding the real value of the contents and the cost of packing.

The letters to which the insurance system is applicable are those which contain valuable paper (bank notes, currency notes, bonds, coupons, securities, etc.) or valuable documents (plans, estimates, contracts etc.) Post-cards, packets of printed papers or commercial papers, sample packets or letters which contain articles other than those mentioned above cannot be insured. An object of value which cannot be sent in an insured letter may be sent generally either in an insured box (foreign service only) or an insured parcel.

A letter for insurance must be presented at the counter of a Post Office. It must not be dropped into a letter box or handed to a Postman.

Every letter tendered for insurance must be enclosed in a strong cover made up in one piece, which must be securely fastened by means of identical seals in fine wax, with spaces between, reproducing a private mark, and affixed in sufficient number to hold down all the folds of the envelope. An envelope with a black or coloured border or a transparent panel must not be used. The make-up of every letter must be such that its contents cannot be got at without external and visible damage to the envelope or its seals.

Space must be left between the postage stamps used for prepayment, and between the postal labels, if any, so that they cannot serve to hide injuries to the envelope. They must not be folded over the two sides of the envelope so as to cover an edge. No labels, except those of the postal service, may be affixed. If the packet is tied round with string or tape, a seal must be placed on the ends where they are tied.

In the case of an envelope with a seam down the middle, the seam should be secured with seals placed not more than 8 centimetres apart.

A letter which, although addressed to a country or place to which the insurance system does not extend, has been irregularly insured, will be returned to the sender.

INSURED BOX SERVICE (FOREIGN ONLY)

Articles of gold and silver, precious stones, jewellery and other articles of a like nature which are prohibited from transmission in insured letters, may generally be sent in the letter mails as insured boxes.

An insured box must not exceed 1 kilogramme in weight or measure more than 30 centimetres in breadth and 10 centimetres in depth. The sides of the wooden box must be at least 8 millimetres thick.

The box must be tied round cross-wise with a single strong string (not two or more pieces joined together), the two ends of the string being held firmly together under a seal of fine wax bearing a private mark. All seals on the four sides of the packet must be identical with that used for sealing the ends of the string.

The boxes must not be wrapped in paper.

Insured boxes are subject to the Customs Regulations and must be accompanied by the appropriate forms, which should be most carefully prepared.

No box can be insured for more than its actual value or the limit of insurance allowed.

Postage and insurance fee must be fully prepaid.

The rate of postage is 8 mils per 50 grammes with a minimum charge of 40 mils. The fee for insurance and the limits of insurance are the same as for insured letters to places abroad.

An Advice of Delivery of an insured box may be obtained on payment of a fee of 13 mils either at the time of posting or subsequently.

SMALL PACKETS.

The small packet service is intended to afford facilities for the transmission of small articles of merchandise in the letter mails to certain foreign countries.

The rate of postage is 9 mils per 50 grams, with a minimum charge of 30 mils. The postage must be fully prepaid.

The maximum dimensions are 45 centimetres in length, 20 centimetres in breadth and 10 centimetres in depth or, if in the form of a roll, 45 centimetres in length and 15 centimetres in diameter.

The limit of weight is 1 kilogramme. Dutiable articles may be enclosed in small packets but, otherwise the prohibitions applicable to the letter post apply also to the service of small packets. In addition, the following are specially excluded from transmission in small packets :—

Letters, notes or documents having the character of actual and personal correspondence (this prohibition does not apply to open invoices reduced to the simplest form, the address of the article, and the sender's address); coin; bank notes; currency notes; negotiable instruments payable to bearer; platinum, gold or silver, manufactured or not; precious stones; jewels and other valuable articles; postage stamps, whether obliterated or not.

Small packets containing dutiable articles are subject to the Customs regulations in the country of destination; and a postal fee for Customs clearance may be charged on each packet on which Customs duty is levied. The fee for the clearance of such packets entering Palestine is fixed at 20 mils.

Small packets are subject to the regulations laid down for samples of merchandise as regards form, make-up and packing (e.g., they must be sent in such a manner as to be easy of examination). In addition, the name and address of the sender must be shown on the outside of the packet; and each packet should be conspicuously marked "Small Packet" in the left-hand top corner.

A green label, giving particulars of the contents for Customs purposes, must be affixed to each packet. In addition, if the country of destination so requires, one or more ordinary Customs Declaration Forms must be enclosed in or attached to the packet.

Small packets may be posted in a posting box or handed over the counter. They may be registered, but not insured.

CASH-ON-DELIVERY SERVICE

INLAND.

An Inland "Cash-on-Delivery" parcel and packet service is in operation. Cash-on-Delivery parcels and packets may be posted at any Post Office in Palestine for delivery at any Post Office in Palestine.

FEES PAYABLE.

On every Inland Cash-on-Delivery parcel or packet a special Cash-on-Delivery fee is charged in addition to the ordinary postage and registration or insurance fee where applicable. The amount of the Cash on Delivery fee varies according to the amount of the Trade Charge, as follows :—

Trade Charge not exceeding										Fee
£P.	Mils									Mils
—	500	20
1	000	30
2	000	35
5	000	50
10	000	60
15	000	70
20	000	80
30	000	90
40	000	100

FOREIGN

A "Cash on Delivery" parcel service with the United Kingdom and Egypt is in operation. Cash on Delivery parcels may be posted at all Post Offices in Palestine.

FEES PAYABLE

The sender must prepay, by means of postage stamps affixed to the Despatch Note, a special Cash-on-Delivery fee at the rate of 1 per cent. of the amount of the Trade Charge with a minimum of 10 mils., plus a fixed "posting fee" of 10 mils per parcel. These fees are additional to the ordinary postage and other charges.

The maximum Trade Charge per parcel is £P. 40.

A delivery fee of 15 mils is collected from the addressee of a "Cash-on-Delivery" parcel in addition to the amount of the trade charge.

PARCEL POST.

CUSTOMS DECLARATION

One or more Customs declarations must accompany every outgoing foreign parcel. The number of copies varies according to the country of destination.

UNDELIVERED PARCELS

Undelivered parcels are disposed of according to the sender's instructions, which should be furnished on the reverse side of the Despatch Note and on the cover of the parcel. When such instructions are not furnished, the parcel is returned to origin at the expiration of one month from the date of receipt in Palestine.

MAKE-UP

Parcels addressed to foreign countries should generally be packed in tin, canvas, linen or similar material, with due regard to the length of journey, conditions of transit, climate, etc.—not merely in paper or cardboard—and in a manner calculated adequately to protect the contents from damage through contact with other parcels.

INSURANCE (INLAND & FOREIGN)

Parcels may be insured for delivery at any Post Office in Palestine, except El Majdal, or to any country which undertakes such service.

The maximum amount for which a parcel can be insured varies according to the country of destination, but in no case may it exceed £P. 120. A parcel may not be insured for an amount exceeding the real value of the contents and the cost of packing.

Insured parcels must be very strongly packed and sealed in accordance with the regulations.

The fee for Insurance, including registration but in addition to the ordinary postage, is 20 mils for the first £P. 12 or part thereof of the insured value and 7 mils for each additional £P. 12 or part thereof.

CHARGES FOR CALL OFFICE CALLS

The charge for the use of a Call Office, including communication with any local subscriber, is 10 mils for each 3 minutes or less during the day and for each 6 minutes or less at night (6 p.m. to 7 a.m.).

Trunk calls may be made from all Call Offices. The charge for use of the trunk, is payable in addition to the Call Office fee except when the trunk charge is less than 10 mils.

The charge is payable at the time of booking the call.

TRUNK LINES

The Telephone Trunk Lines which connect the various Telephone Exchanges throughout Palestine can be used by Callers from all Public Call Boxes, as well as by Subscribers connected with Telephone Exchanges.

The unit period of conversation is three minutes (6 minutes between 6 p.m. and 7 a.m.) from the time when the caller or subscriber has been informed that the connection is completed; but any caller, by prepaying a double fee in advance, may secure, on demand at the end of the first period, the option of extending a unit call to double time.

An "Urgent" Trunk call Service is available for all public subscribers and at Telephone Call Offices. Such calls, which take precedence over all ordinary trunk calls already booked and not completed, are charged for at double the ordinary rates.

When the option of extending a call has been asked for by a caller and the call expires within the unit period, the fee for the second period will be refunded.

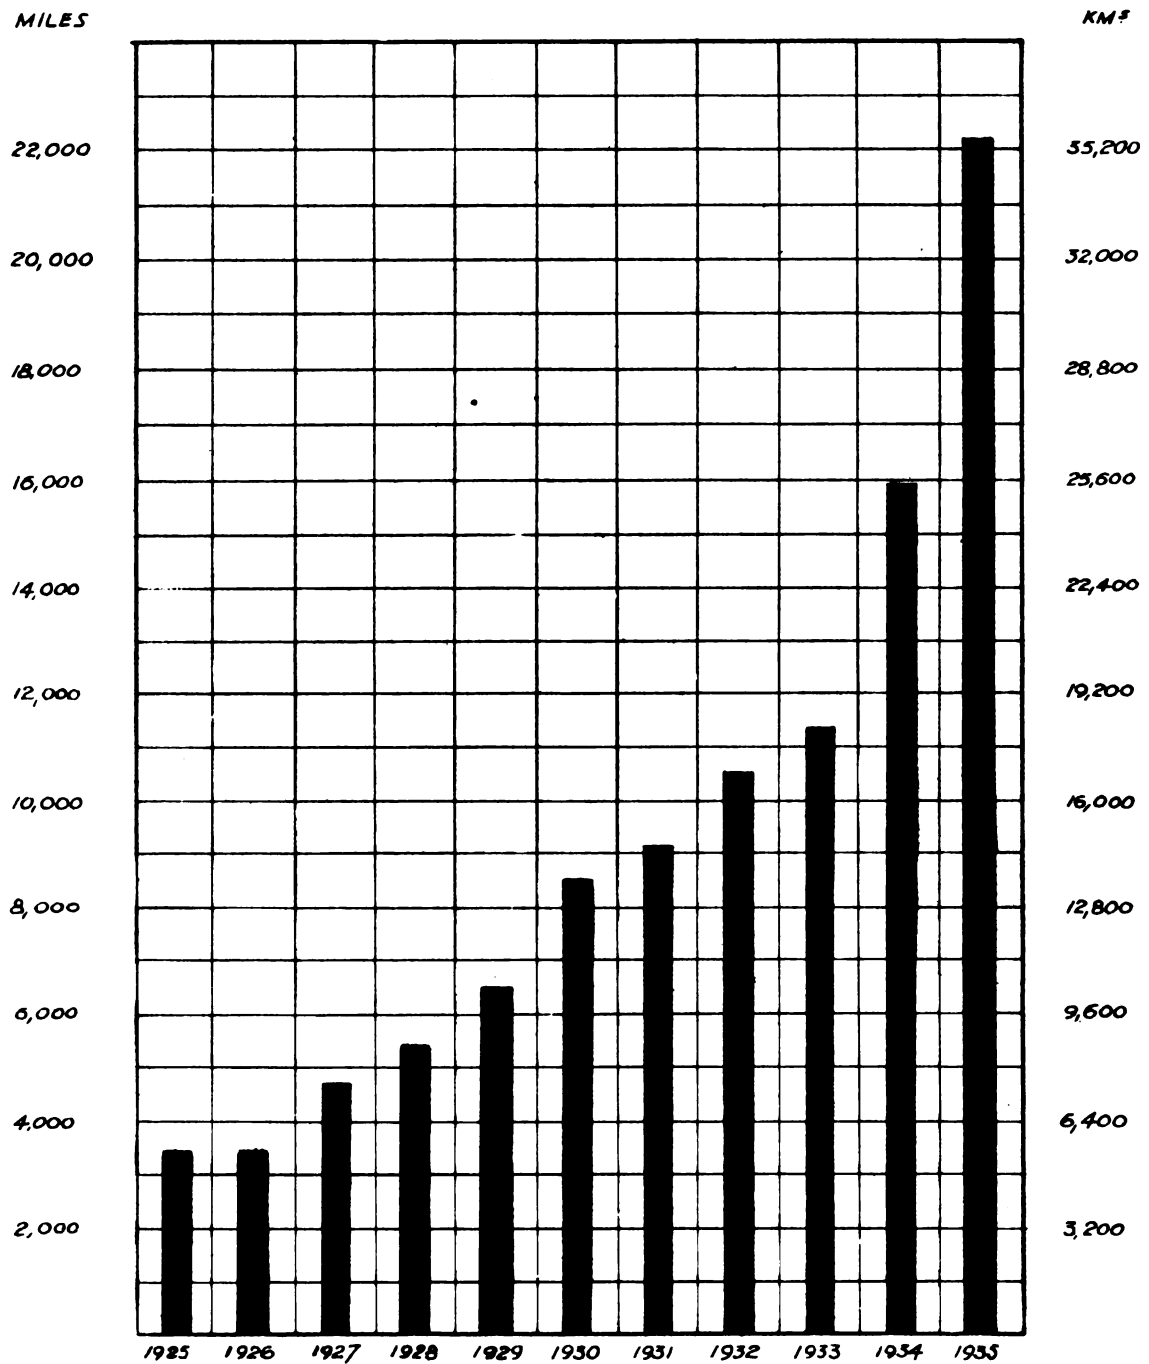

No person is entitled to use a trunk line continuously for more than six minutes during the day or twelve minutes at night, but exceptions may be made when the trunk is available for a further period.

No charge is made for the use of a trunk line when the person in attendance at the originating telephone is not placed in a position to converse with some person attending at the telephone of the distant subscriber.

When a call is cancelled after the attention of the distant subscriber has been obtained, and effective communication is practicable but not established through inattention on the part of the calling subscriber, the full cost for a unit conversation is charged.

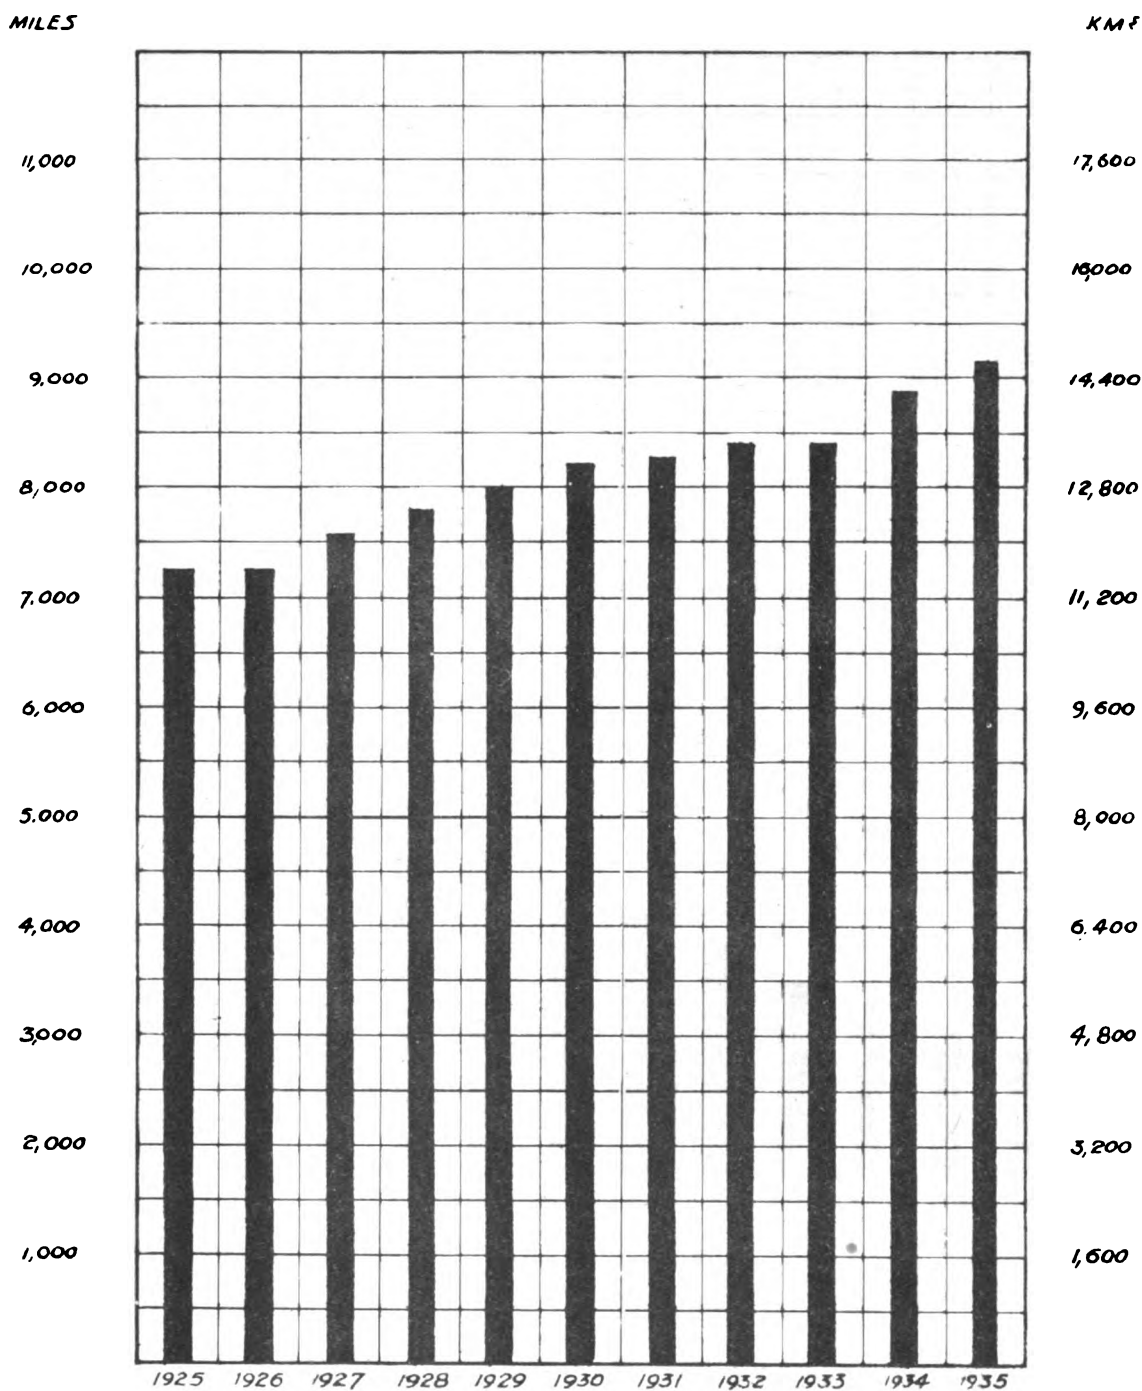

A telephone subscriber is required to deposit with the Postmaster General a minimum sum of £P. 1.500 mils as a Trunk Call Account Guarantee Deposit, or if the Postmaster General so desires, a sum equal to two thirds of the amount of the subscriber's average quarterly account for trunk calls. The sum so deposited is returnable to the subscriber, less the amount of any accounts due to the Postmaster General, when the subscriber relinquishes the telephone.

OFFICIAL LANGUAGES, CURRENCY, WEIGHTS AND MEASURES, CALENDARS AND OFFICIAL HOLIDAYS

OFFICIAL LANGUAGES

The official languages are English, Arabic and Hebrew.

CURRENCY

It was declared by public notice that as from the 22nd January, 1921, the following currency only should be legal tender in Palestine :—

“ Egyptian gold, notes, silver and nickel coins, and the British sovereign at the rate of 97.50
“ piastres Egyptian. No restrictions, however, was placed on the circulation, in the ordinary course
“ of trade, of coins of other currency at their current market rates.”

The Order-in-Council dated the 7th February, 1927, Currency Notes Ordinance, 1927, and the Proclamation by the High Commissioner under section 11 (2) of the Order-in-Council provide for the introduction of a Palestine currency consisting of coins and currency notes with effect from the 1st November, 1927. Other legislation relative to currency is contained in the Currency Substitution Ordinance, 1927, the Coinage Ordinance, 1927, the Bank Notes Forgery Ordinance, 1927, and the Coinage Amendment Ordinance, 1929.

A Currency Board has been constituted to provide for and to control the supply of currency, to ensure that the currency is maintained in satisfactory condition and generally to watch over the interest of Palestine as far as currency is concerned. The board makes arrangements for minting of coins, printing of currency notes, and investment of the funds of the board.

The board authorizes the issue of currency in Palestine against prepayment in London ; and arranges for issue, against currency tendered in Palestine, of drafts or telegraphic transfers payable in sterling in London.

The proceeds of the sale of coin and currency notes and all other revenue of the board are, after the necessary deductions have been made for all expenses and for any contributions made to the revenues of Palestine, credited to a Currency Reserve Fund, and any losses which may be incurred are debited to the fund. Any contribution to the revenues of Palestine is made after the Board and His Majesty's Secretary of State for the Colonies are satisfied that the reserves are adequate to ensure the convertibility of the currency and to provide a reasonable reserve against depreciation of investments.

The standard of currency is the Palestine pound (£P.) divided into 1,000 mils. The Palestine Currency Order provides for a gold coin of one Palestine pound containing 123.27447 grains of standard gold (the equivalent of the pound sterling) : it is not intended at present to introduce gold coins. Silver coins, 720 fine, of 100 and 50 mils, weighing 180 and 90 grains respectively, nickel-bronze coins of 20, 10 and 5 mils, and bronze coins of 2 and 1 mils are in use. Silver coins are legal tender for the payment of £P.2, nickel-bronze coins of 20 and 10 mils are legal tender for the payment of any amount not exceeding 200 mils, and coins of lower denominations are legal tender for an amount not exceeding 100 mils. Currency notes of £P. 100, £P. 50, £P.10, £P. 5, £P. 1 and £P. $\frac{1}{2}$ are in use and are legal tenders of the amounts expressed therein.

The Currency Board is represented in Jerusalem by the Treasurer of Palestine and by Barclays Bank (Dominion, Colonial and Overseas).

Egyptian gold, notes, silver and nickel coins, and the British gold sovereign were by proclamation declared not to be legal tender after the 31st March, 1928.

COMPARATIVE STATEMENT OF REVENUE FOR THE YEARS 1934-1935 AND 1935-1936

Heads and sub-heads of revenue according to the classifications employed in the estimates	Actual revenue 1934-35 £P. mils	Actual revenue 1935-36 £P. mils	Increase £P. mils	Decrease £P. mils	Causes of increase or decrease
I.—CUSTOMS :					
Import duty	2,600,366.551	2,751,243.765	150,877.214	—	The increase in receipts from customs import duty is mainly due to increased imports of benzine, kerosene, tobacco and cigarettes and wearing apparel. During the latter part of the year there were heavy falls in the imports of cement, motor cars and trucks, cotton piece goods and silk tissues, sugar and wheat, and wood for building purposes, attributable to the unsettled political situation in Europe from October 1935 to the end of the financial year under review.
Export duty	3.540	2.160	—	1.380	
TOTAL CUSTOMS	2,600,370.091	2,751,245.925	150,877.214	1.380	
II.—PORT AND MARINE :					
Anchorage dues	12,082.872	12,453.625	370.753	—	Increase in the total tonnage of steam and sailing vessels which entered and cleared in the ports of Palestine consequent on increased trade.
Registration fees	74.000	124.300	50.300	—	
Light dues	16,047.219	19,797.751	3,750.532	—	Increase due to increased shipping at Haifa consequent on increased trade.
Berthage dues	6,415.345	6,930.570	515.225	—	
Mooring dues	1,911.957	1,501.416	—	410.541	Due to the more expeditious handling of cargo by the Government portage service thereby releasing vessels without undue delay and enabling greater use to be made of the main wharf.
Wharfage dues	35,272.811	36,750.477	1,477.666	—	
Pilotage and towage dues	12,311.500	13,769.000	1,457.500	—	The decrease which is counterbalanced by the increase under berthage dues is due to the berthage of more ships at the main wharf.
Oil dock dues	6,361.041	16,000.000	9,638.959	—	
Miscellaneous	224.400	269.528	45.128	—	Increased trade.
TOTAL PORT AND MARINE	90,701.145	107,596.667	17,306.063	410.541	do.
					Increase due to a full year's working (as compared with five months in 1934-35). Fees are levied at the rate of 2d. a ton on oil loaded into the Iraq Petroleum Company's vessels from sea lines, until the oil dock is completed, when the I. P. C. will pay a minimum annual fee of £P. 30,000.

A reduced scale of licence fee came into effect on 1st July, 1935. Under the new measure licences are valid for one year from the date of the issue of the licence, with the exception of a certain category of motor vehicles for which licences may still be issued quarterly or half-yearly. When the new measures came into effect fees for one quarter (June quarter) were already collected and the licences issued in July were taken for a complete year. Thus it will be seen that an additional quarter's licence fees were collected in 1935-36 which will not occur in 1936-37.
Tobacco	7,944.397	9,444.000	1,499.603	—	Increase in the number of retailers' licences.
Trades and industries	663.350	944.150	280.800	—	Increase in the number of licences issued.

Approximately £P. 16,000 was collected in 1935-36 in respect of the assessment for 1936-37. The revenue from this source in 1934-35, however, was affected by remissions granted in 1933-34.
House and land tax	126,709.998	37,267.222	—	89,442.776	The house and land tax was replaced with effect from 1st April, 1935, by the rural property tax except in Beersheba and the Huleh areas. The collections during the year are mainly therefore in respect of arrears.
Tithes	108,919.902	25,548.230	—	83,371.672	The tithe, except in the Beersheba and the Huleh areas, was replaced by the rural property tax with effect from 1st April, 1935. The collections in 1935-36 are partly in respect of arrears and partly in respect of the tithe which is still in force in the Beersheba and Huleh areas. There was, however, a remission of 50% of the assessment of commuted tithe in Beersheba area on account of the complete failure of the later rains in 1935.

Urban property tax	225,580.049	241,040.509	15,460.460	—	Increase occasioned by new buildings falling due for assessment, the application of the tax to additional areas and the quinquennial re-assessment in certain areas where the tax had been applied with effect from 1929. The rate of the tax on house property was reduced, however, from 12½% to 10% with effect from 1st April, 1935.
Stamp duties	105,253.892	124,476.870	19,222.978	—	The increase is due to the increase of commercial transactions generally and to the fact that two Muharrams fell within one financial year and that two leases, which are subject to stamp duty were executed in the financial year under review.

The principal increases occur under personal emoluments (£P. 28,273) owing to the very large increase in work in the four principal towns, headquarters branches, existing sub-offices and establishment of new offices; conveyance of mails (£P. 14,250) chiefly due to greater use of air-mail services by the public; establishment of renewals fund (£P. 20,000); the fund was created in 1935-36 in order to apportion the cost of renewals of post office buildings and equipment over a number of years in order to avoid heavy expenditure in those years when the assets fall to be replaced; stationery and printing (£P. 3,092) owing to a great increase in the work of the department to meet outstanding charges from 1934-35 and to make good depleted reserve stocks; rent and repairs of buildings (£P. 5,789) due to increase in rentals renewed during the year and to the additional premises which were found to be required; and broadcast and marine wireless service (£P. 8,875). The broadcasting service was inaugurated in March 1936, but the programme directional and compilation staff was engaged and the organization and preparatory steps taken immediately on the arrival of the adviser on 1st October, 1935.

Increases occur mainly under personal emoluments (£P. 8,099); and transport and travelling (£P. 1,372) and are due to the expansion of departmental activities particularly in connexion with an extended building programme.

Increases occur mainly under rent of offices and quarters (£P. 36,169) partly to additional hirings for some departments and to increased rentals of existing hirings and partly to the fact that two Hejira years fell within the same financial year which made it necessary to pay twice in 1935-36 in respect of leases falling on the first day of the two Hejira years 1354 and 1355, thus accounting for approximately £P. 24,000 of the increase in rent; maintenance of plant and machinery (£P. 9,088) due to the largely extended road programme entailing increased cost of maintenance of rollers and road-making plant; maintenance of roads and bridges (£P. 2,985); maintenance of buildings (£P. 2,020) necessitated by additional roads and buildings maintained during the year; and maintenance of Jerusalem water supply (£P. 1,912) due to the inauguration of the Ras-el-Ain water supply for Jerusalem in January 1936.

The principal increases occur under grants to municipalities (£P. 37,621) due to considerable increase in grants to municipalities to enable them to carry out programmes of essential works long overdue; grant for flood damage, Nablus (£P. 1,619) in respect of areas outside the municipal boundaries of Nablus for clearance of debris caused by a cloudburst in February 1935; payment of tithes assigned to private waqfs (£P. 5,328) due to the payment of assigned tithe to the Mutawalli of the "Mustafa Lala Pasha and Fatima Kharun Waqf" for the period 1st July, 1920 to 31st March, 1935, in respect of one-half of the villages of El Mujeidel and Iksal; cost of living allowances (£P. 60,762) included under departmental votes in 1934-35; the allowance was restored to the level prevailing before November 1931, when it was reduced by approximately 50%; refunds in respect of revenue collected in previous years (£P. 3,395) mainly due to the refund of £P. 2,156 to Jaffa municipality on account of an excess payment in respect of the municipality's contribution towards the construction of the southern approach road to the port; losses on investments (£P. 3,192); contribution towards the reconstruction of the Mafraq Jisr Majami road (£P. 8,300); purchase of copyright of the Handbook of Palestine and Trans-Jordan (£P. 1,200); flood relief measures Khalissa and Buweiziya villages (£P. 1,694) necessitated by a cloudburst in November 1934; and registration fees and capital duty in respect of Agricultural Mortgage Company of Palestine Ltd. (£P. 2,044) paid in accordance with an agreement between Government and the Company. On the other hand there were decreases under stationery and printing (£P. 8,809) the charges in 1935-36 being mainly borne under Head IV Secretariat Printing and Stationery Section; flood relief works, Tiberias (£P. 3,267); payment to the Supreme Moslem Sharia Council in lieu of assigned waqf tithes (£P. 59,440) on account of arrears of tithe of additional waqf villages and lands paid in 1934-35; and settlement of claim for damage by earthquake to the Kaiserin Augusta Victoria Stiftung, Jerusalem (£P. 7,000).

SECTION VI

MUNICIPAL CORPORATIONS AND OTHER LOCAL BODIES

1. There are twenty-three municipalities in Palestine, of which eight are in the southern district, five in the Jerusalem district and ten in the northern district. All municipalities save that of Tel Aviv which was established in 1934 under the Municipal Corporations Ordinance, 1934, were created under the Ottoman regime and were governed by the Ottoman Wilayet Municipal Law of the 5th October, 1877, and other Ottoman laws and Palestine ordinances.

2. The functions, powers and duties of municipal councils are now derived from and imposed by the Municipal Corporations Ordinance, 1934.

3. The ordinance provides that the municipalities existing at the time of its enactment and the township of Tel Aviv shall become municipal corporations and the High Commissioner is given power after consulting the views of the public concerned to establish more municipal corporations or to abolish municipal corporations and likewise to vary the area of any municipal corporation established under the ordinance.

4. The ordinance provides that the affairs of municipal corporations shall be managed by councils elected by direct election. The qualifications of voters are as follows :—

- (a) Males of Palestinian citizenship (not applicable in the case of Tel Aviv where females and non-Palestinians may also vote).
- (b) Not less than 25 years of age (in the case of Tel Aviv not less than 21 years of age).
- (c) Not under disability.
- (d) Not to have been sentenced to a term of imprisonment of one year or upwards.
- (e) A payment within twelve months preceding the date of the preparation of the register of voters of tax to an annual amount of at least 500 mils on immovable property owned within the municipal area ; or payment of municipal rates to an amount of at least £P. 1 ; or separate occupation of premises within the municipal area on which rates to that amount have been paid within the preceding twelve months. (In the case of Tel Aviv, ownership of immovable property in the municipal area, or residence in such area for twelve months preceding the date of the preparation of the register of voters or payment within twelve months preceding such date of municipal rates and/or taxes to an amount of at least 500 mils).

In Tel Aviv a woman is entitled to be enrolled in the register of voters if she is the wife of a person who is entitled to be so enrolled in respect of premises in which they reside together.

Community rolls have been abolished. The High Commissioner is, however, given power, on the representation of a council, to change the qualifications of voters.

5. The High Commissioner is given power at his discretion when it appears to him necessary in the interests of good government to nominate not more than two councillors to each of the municipal corporations of Jerusalem and Haifa.

6. The qualifications for councillors are as follows :—

- (a) Eligibility to be enrolled as voter in the register of voters.
- (b) A place of residence within the municipal area.
- (c) Not less than 30 years of age (in the case of Tel Aviv not less than 25 years of age).
- (d) A payment within twelve months preceding the date of his nomination of taxes of at least £P. 1 on immovable property owned within the municipal area, or of municipal rates to an amount of at least £P. 2, or separate occupation of premises within the municipal area on which municipal rates to an amount of at least £P. 2 have been paid within the preceding twelve months (in the case of Tel Aviv, a payment of municipal rates to an amount of £P. 1 during the twelve months preceding the date of appointment of the electoral committee).
- (e) Not being an undischarged bankrupt.
- (f) Not to have an interest directly or indirectly in any contract with, by or on behalf of the municipal corporation.
- (g) Not being a paid officer of the Government or municipal corporation or other local authority.

The High Commissioner is given power, on the recommendation of a council, to alter any of the qualifications appearing in paragraphs (a) to (d) inclusive for members of that council.

7. The ordinance provides that councillors shall ordinarily be elected for the whole of the municipal area but the High Commissioner is given power when it appears to him desirable to divide a municipal area into divisions for the purpose of elections.

8. The Mayor and Deputy-Mayor are appointed by the High Commissioner from among the councillors and councils are given power to set up committees to deal with various matters, upon which committees the District Commissioner may appoint an officer of the Government of Palestine as an advisory member.

9. If for any reason a council expires before the due date or ceases to perform its functions, the High Commissioner may either order a general election to be held or nominate a council or nominate a commission to perform the duties of the council.

10. The ordinance provides for the establishment of urban committees within any district included within a municipal area, if the inhabitants of such district so desire. Such committees will have power to approve additional expenditure, the funds for which will be provided by additions to the rates payable by persons residing within the area concerned.

11. The ordinance provides that the accounts of all municipal corporations shall be audited by an auditor to be appointed by the High Commissioner and that estimates shall be approved by the High Commissioner.

12. The ordinance provides for the establishment of a permanent staff of municipal officers and councils, with the approval of the High Commissioner, are given power to make regulations governing the conditions of service of such officials and the grant to them of pensions and gratuities.

13. Provisions are made with regard to contracts to be entered into by councils, and for contracts involving expenditure of more than a certain amount, councils must call for tenders.

14. The ordinance empowers municipal councils, subject to the approval of the High Commissioner to raise loans secured on the properties and revenue of the councils.

15. The duties and powers of councils are set out in the ordinance in detail and they are given adequate powers to make, with the approval of the High Commissioner, bye-laws to enable them to carry out those powers and duties.

16. The ordinance provides for the imposition of rates, the municipal property rate being payable by the owner of property and other rates being payable by the occupier of property. Special provisions have been incorporated to deal with persons occupying one or two rooms who are generally spoken of as "lodgers" who are made liable to pay to the occupier of the house in which they live a proportion of the rates paid by such occupier.

17. Provisions are included for the preparation of assessment lists and for appeals therefrom and for the collection of rates which are in arrear.

18. The Municipal Courts Ordinance, empowers the High Commissioner to appoint fit persons of education and standing to be magistrates of a town. He may, on the recommendation of the Chief Justice, appoint as chairman of a municipal court a stipendiary magistrate. Cases within the jurisdiction of the court are tried by a bench consisting of not less than two members but the stipendiary magistrate may try any case sitting alone. The jurisdiction of these courts extends to any offences against municipal regulations and bye-laws or any offences committed in a municipal area which are specified in chapter III articles 254 to 265 inclusive of the Ottoman Penal Code (which has been replaced by the Criminal Code Ordinance, 1936), or in the following ordinances :

- (a) The Public Health Ordinance ;
- (b) The Road Transport Ordinance ;
- (c) The Town Planning Ordinance ;
- (d) The Sale of Intoxicating Liquor Ordinance, 1935 ;
- (e) The Public Entertainments Ordinance, 1935 ;
- (f) The Trades and Industries (Regulation) Ordinance.

The court is entitled to pass a sentence not exceeding a fine of £P. 5 or imprisonment for fifteen days or both these penalties.

Appeal from conviction by a municipal court lies to the district court as of right where the sentence is one of imprisonment, and by leave of the president of a district court where a fine has been imposed.

19. The revenues of municipal corporations are drawn from the following sources :—

- (a) Municipal property rate varying to a maximum of 10% to be levied upon the owners of property ;
- (b) A general rate varying to a maximum of 15% to be levied upon the occupiers of property ;

LOCAL COUNCILS

The Local Councils Ordinance empowers the High Commissioner on the recommendation of a District Commissioner by an order published in the Official Gazette to declare that any large village, area, quarter of a town having a distinctive character, or group of villages shall be administered by a local council.

The order may prescribe the composition and functions of the council.

Councils are invested with juristic personality and may, with the approval of the District Commissioner, raise a loan secured on their property and revenues.

Councils can, with the sanction of the District Commissioner levy rates upon the owner or occupier of property in the village, area or quarter and may impose also a poll tax on the inhabitants and certain fees for licences or otherwise as a municipal corporation is authorized for the time being to impose or as may be imposed by a local council under any ordinance. The rates and fees which may be imposed or charged by any council are set out in the order constituting each council. Under the Trades and Industries (Regulation) Ordinance, a local council is given the same powers as a municipal council with regard to the regulation of trades and industries carried on within its area which affect public health and public order.

Twenty seven local councils have been established in Palestine of which seventeen are in the northern district, six in the southern district and four in the Jerusalem district.

SECTION VII

DEMOGRAPHIC STATISTICS

POPULATION, HOUSING, VITAL STATISTICS, MIGRATION AND NATURALIZATION

POPULATION

Note :—For a full account of the population, its development up to 1931 and its geographical distribution, reference should be made to chapters I and II of volume I of the Census of Palestine 1931.

The population of Palestine, excluding members of His Majesty's Forces, was estimated to be 1,336,518 at the 30th June, 1936, the division into religious communities being as follows:—

Moslems	848,342
Jews	370,483
Christians	106,474
Others	11,219
Total									1,336,518

This classification by religious community has been adhered to in population statistics since the time of the British Occupation. This classification in vital occurrences is socially necessary because the law of personal status in Palestine is the law of the particular religious community to which a person belongs.

It was recognized in the census of 1931 that classification by 'race' or 'nationality' into the broad groups, Arabs, Jews and Others, is a political necessity. Statistics of migration were put on a 'racial' basis in 1935 and in 1937 the classification of vital occurrences will be twofold, namely, by religious confession and by 'race' or 'nationality'. The re-introduction of a classification of migration by religious confession will make it possible to keep population records in future both by religion and by 'race'.

At the time of the 1931 census, persons were asked to state to which of the three groups (Arabs, Jews and Others) they belonged. The following table shows the inter-connexion between the religious communities and 'racial' groups that the census revealed. Nomads are omitted.

Race	Religion				
	All religions	Moslems	Christians	Jews	Others
All races	969,268	693,159	91,398	174,610	10,101
Arabs	772,904	690,420	73,281	87	9,116
Jews	174,809	21	25	174,378	385
Others	21,555	2,718	18,092	145	600

Out of 693,159 Moslems, 690,420 or 99.6 per cent. described themselves as Arabs. The remainder were mainly Egyptians and Turks. Out of 91,398 Christians, 73,281, or 82 per cent. were Arabs. The remainder were principally members of European races and Armenians. The "Others" numbered 10,101 of whom 9,116 described themselves as Arabs, and were in fact mostly Druze by religious confession.

If it be assumed that now, as in 1931, the Arab population is made up of 99.6 per cent. of all settled Moslems, 82 per cent. of all Christians, 90 per cent. of all other non-Jews and the whole nomad Beduin population, the following rough estimate of the population on the 30th June, 1936, classified by 'race', is reached :—

Arabs	942,000
Jews	370,000
Others	24,000
Total									1,336,000

A census of population was taken on the 23rd October, 1922, and again on the November 18th, 1931. In the intervening years statistics of births and deaths and of migration were used to estimate mid-year populations. A discrepancy appeared at the census of 1931 between the expected and the enumerated population, due to incomplete recording of births and deaths and of migration, and possibly to faulty enumeration of suspicious and primitive people. In the case of Jews the discrepancy was about two thousand. The discrepancy has been distributed over the inter-censal years and the adjusted series of estimated populations are as follows :—

POPULATION OF PALESTINE
(Excluding members of His Majesty's Forces) at the census of 1922, and as estimated at 30th June in each of the years 1923-1936, by religions.

Year	All religions	Moslems	Jews	Christians	Others

1924	804,962	627,660	94,945	74,094	8,263
1925	847,238	641,494	121,725	75,512	8,507
1926	898,362	663,613	149,500	76,467	8,782
1927	917,315	680,725	149,789	77,880	8,921
1928	935,951	695,280	151,656	79,812	9,203
1929	960,043	712,343	156,481	81,776	9,443
1930	992,559	733,149	164,796	84,986	9,628
1931	1,023,734	753,812	172,028	87,870	10,024
1932	1,052,872	771,174	180,793	90,624	10,281
1933	1,104,884	789,980	209,207	95,165	10,532
1934	1,171,158	807,180	253,700	99,532	10,746
1935	1,261,082	826,457	320,358	103,371	10,896
1936	1,336,518	848,342	370,483	106,474	11,219

There has been unrecorded illegal immigration both of Jews and of Arabs in the period since the census of 1931, but it is clear that, since it cannot be recorded, no estimate of its volume is possible.

The estimated total population has increased in the fourteen years since 1922 by 584,470 persons. The increase is due to immigration and to the excess of births over deaths, the allocation of the total increase between these two factors being estimated to be as follows:—

	All religions	Moslems	Jews	Christians	Others
Total increase of population	584,470	259,165	286,693	35,010	3,602
Natural increase	315,013	236,630	49,655	25,462	3,266
Increase by migration	269,457	22,535	237,038	9,548	336

The precision of these figures is not great, but they indicate that all three main religions have gained by migration, the smallest proportional gain being that of Moslems. It is of interest that the Jewish increase by migration in the fourteen-year period is very nearly the same as the Moslem natural increase in the same period viz. about 237,000.

The figures of increase by migration include about ten thousand persons, who were added to Palestine by an alteration of the boundary with Syria in 1923. The Jewish settlements of Tel Hai, Kfar Giladi and Metulla are in this area and had a total population of about 300, the remaining inhabitants of the area being Moslems.

HOUSING

At the census taken on the 18th November, 1931, the settled population of Palestine was returned as dwelling within 215,825 houses, yielding an average household of 4.5 persons. The definition of house for census purposes was not included in the legislation for the reason that it was desirable to gather experience of the local usage of the word in the vernaculars. The definition adopted was:—

“House is the dwelling place of a commensal family with its resident dependants such as widows and servants. In exceptional cases it may be the enclosure or residence of one or more families having a separate entrance from the common way.”

The definition satisfied two needs in a country where household differs from town to village and from one community to another. The question has two aspects, the structural and the social. The structural aspect is statistically useless, but, in some villages, gives the only guide for control of enumeration. The social aspect not only facilitates control of the enumeration but is also statistically valuable in giving conceptions of the familial unit. The definition was, on the whole, satisfactory, but its application in certain areas showed a lack of understanding and, in some cases, of ordinary sense. In Tel Aviv and in some villages in Nablus sub-district a single man, having a bedroom in an ordinary house, that is, a lodger, was sometimes returned as forming a separate household. In other cases, in Jewish villages of the communal type, where large hutments accommodate a number of persons constituting, according to traditional European notions, separate households, a few houses were returned as the residences of two score or more persons, no distinction being made as to the separate family arrangements, probably because the people themselves refused to make the distinctions. An examination of the statistics, however, reveals that the errors on one side tend to equilibrate the errors on the other side for areas that are larger than village units, so that the averages for sub-districts and towns may be taken as substantially accurate. The numbers of persons per occupied dwelling (separate) in England and Wales in 1921 was 4.85. A separate dwelling in England is not necessarily a separately constructed discrete building, but is often a house in which structural alterations permit of complete familial privacy. The question of definition in these matters is of the greatest importance, but, generally, there is a rough correspondence between the “occupied dwelling” of England and the “house” of Palestine as defined for the census taken in 1931. The comparison breaks down, however, when the number of rooms is taken into account. The average number of rooms per occupied dwelling in England and Wales in 1921 was 5.14, whereas in Palestine it is considerably smaller. No statistics were taken at the census in regard to this matter, but the number of rooms available for a family, that is, an ordinary domestic household, does not, in all probability, exceed two.

In the towns all types of houses are found. Houses in the villages are constructed of the material found most easily. In the hill country, stone is employed; in the villages of the southern part of the maritime plain, mud bricks are commonly the material of construction.

ESTIMATED POPULATION OF THE FOUR MAIN TOWNS OF PALESTINE BY COMMUNITIES
(end of 1936)

	Total	Moslems	Jews	Christians
Jerusalem	125,000	26,000	76,000	23,000

Four towns	435,000	98,000	280,000	57,000

The Jerusalem population is that of the birth-registration area which is rather larger than the municipal area. It includes the suburbs of Montefiore, Beth Hakerem, Beit Vegan, Givat Shaul, Meqor Hayim, Talpiot and Ramat Rachel. The Jewish population of Jaffa is considerably smaller than before the disturbances of April. It is estimated that ten thousand Jews, chiefly from the Manshiyah quarter, left Jaffa for Tel Aviv or for agricultural settlements during the disturbances. There is a small non-Jewish population in Tel Aviv, and small Bahai population in Haifa. These populations neither of which is as great as five hundred, are included with the Jewish and Moslem populations in Tel Aviv and Haifa respectively.

VITAL STATISTICS

Records of vital occurrences are compiled for the settled population statistics, being available, classified by religion from the year 1922. The nomadic population, among which vital occurrences are not recorded, numbered 66,553 at the census of 1931.

A re-calculation of birth and death rates was made in 1936, based upon a revised series of estimates of the population in the years between the census of 1922 and the census of 1931. The following tables give the average number of births, deaths and infant deaths, as well as the average crude birth and death rates and infant mortality rates in the years since 1922, and the actual figures for the individual years 1934, 1935 and 1936. Details of deaths by ages in the year 1936, and of infant mortality by medical sub-district in 1935 and 1936 are also given.

The very high birth rate of Palestine is established by the preponderance of Moslems, who show the highest birth rate of all religions. The Moslem population advanced by natural increase at an average rate of 18,000 per annum, or about two and half per cent. per annum in the five years 1931-1935. The Jewish birth rate, though considerably lower than the Moslem, was higher for the same quinquennium than that of any European country except Rumania.

A very great disproportion is evident between the Moslem and Jewish death rates, and it has been accentuated by a steady decline in the Jewish death rate in the fifteen years since 1922. While it is undoubted that the difference reflects a greater expectation of life,—particularly in infancy—among Jews than among Moslems, it must be noted that the Jewish population is made up largely of young adult immigrants who are in those years of life when the risk of dying is at its lowest, and the smaller proportion of infants and old people which this immigration has produced is itself a cause of a low crude death rate.

The celebration of marriages in Palestine, together with the granting of divorces, is governed by the law of the religious community to which the parties belong. The Government requires only that every marriage celebrated and every divorce granted be registered by the religious authority and that copies of all such registrations be sent to the office of the District Commissioner. Statistics of marriages and divorces in 1935 and 1936 are given in another table.

*Incomplete.

Emigration statistics by race were not compiled prior to 1922, nor in the years 1932-1934, inclusive. In 1935 and 1936 the figures of emigrants are those of "residents departing for a period of more than one year".

PRINCIPAL TABLES OF MIGRATION 1936

In these tables the term "registered immigrants" includes persons arriving as immigrants, persons arriving as travellers and registered as immigrants in 1936 and persons exempted from the provisions of the Immigration Ordinance No. 38 of 1933.

I	SUMMARY OF ARRIVALS IN AND DEPARTURES FROM PALESTINE This table reveals the inward and outward migration for the year by continents of usual residence and by the 'racial' or 'national' declaration of the migrants. Persons 'in transit' through Palestine are shewn separately since, on the whole, the period of residence in Palestine of persons in transit is of little material consequence to the economy of Palestine.	129
II	ANALYSIS OF ARRIVALS This table is composed of five sub-tables :— (a) shewing the relationship of passengers to Palestine and the means of transport which those passengers use in entering the country ; (b) shewing the various purposes for which persons, who are not immigrants, enter Palestine and the mode of transport used in each case ; (c) shewing the aggregate of immigrants classified by 'racial' or 'national' declaration and by the category of immigrants prescribed by the Immigration Ordinance No. 38 of 1933, this aggregate consisting of immigrants actually arriving as such, shewn in sub-table (d), and of travellers in Palestine subsequently registered as immigrants shewn in sub-table (e).	129
III	DEPARTURES BY SEA, LAND AND AIR This table is the counterpart of table II (a) and shews the relationship to the country of persons leaving Palestine and the mode of transport they use. The class 'residents departing for a period exceeding one year' is in general international understanding held to be the class of emigrants unless the persons are leaving the territory for a special and temporary purpose, e.g. a university course.	131
IV	BIRTHPLACE OF IMMIGRANTS ARRIVING AND OF RESIDENTS DEPARTING PERMANENTLY This table shews the countries of birth of immigrants and emigrants.	132
V	CITIZENSHIP OF IMMIGRANTS ARRIVING AND OF RESIDENTS DEPARTING PERMANENTLY This table shews the citizenship of immigrants and emigrants.	133
VI	(a) COUNTRY OF PREVIOUS ABODE OF IMMIGRANTS ARRIVING (b) COUNTRY OF DESTINATION OF RESIDENTS DEPARTING PERMANENTLY These tables shew (a) the countries of previous residence of immigrants arriving as such, and (b) the countries of destination of emigrants.	134 135
VII	(a) REGISTERED IMMIGRANTS CLASSIFIED BY 'RACIAL' OR 'NATIONAL' DECLARATION AND PREVIOUS OCCUPATIONS (b) EMIGRANTS CLASSIFIED BY 'RACIAL' OR 'NATIONAL' DECLARATION AND PREVIOUS OCCUPATIONS These tables classify (a) immigrants registered (i.e. persons arriving as immigrants and travellers subsequently registered as immigrants) according to the declaration of occupation at the time of arrival in Palestine ; and (b) emigrants according to their habitual occupation declared at the time of departure from Palestine.	136 136
VIII	BIRTHPLACE, CITIZENSHIP AND COUNTRY OF PREVIOUS RESIDENCE OF TRAVELLERS CLASSIFIED BY 'RACE' OR 'NATIONALITY' AND REGISTERED AS IMMIGRANTS This table gives information about travellers registered as immigrants during the year, which is similar to that given in tables IV, V and VI for immigrants arriving as such.	137
IX	COUNTRY OF USUAL RESIDENCE OF TEMPORARY VISITORS This table shews the countries whence temporary visitors classified by 'racial' or 'national' declaration come to Palestine for the several 'non-immigrant' purposes, e.g. holiday, business, etc. which are set out in table II (b).	138
X	AGE, SEX AND CONJUGAL CONDITION OF IMMIGRANTS AND EMIGRANTS This table gives (a) the distribution of all registered immigrants classified by 'racial' or 'national' declaration, by age and conjugal condition ; (b) the similar distribution for all emigrants ; and (c) the similar distribution for those emigrants whose birthplace is Palestine.	139
XI	ANALYSIS OF PASSENGER TRAFFIC IN TRANSIT In a technical sense a person is in transit in Palestine when he holds a visa for entry which is valid for 72 hours' sojourn in the country only, and this table shews the distribution of such persons among countries from which proceeding and countries of destination.	142
XII	CATEGORIES OF JEWS REGISTERED AS IMMIGRANTS DISTRIBUTED BY COUNTRIES OF PREVIOUS ABODE This table gives the cross-classification of all Jewish immigrants in the several categories prescribed by law and their countries of past usual residence. It has some bearing on the sources of the capital introduced into Palestine.	144
XIII	BIRTHPLACE, PLACE OF USUAL RESIDENCE AND CITIZENSHIP OF PERSONS REFUSED ADMISSION TO PALESTINE CLASSIFIED BY 'RACE' OR 'NATIONALITY' This table shews the countries of origin of persons arriving at the prescribed places of entry into Palestine but refused admission to the country.	145
XIV	COUNTRY OF PREVIOUS ABODE OF PERSONS OF WHOSE ENTRY INTO PALESTINE THERE IS NO RECORD AND OF PERSONS DEPORTED This table shews the birthplace of persons of whose arrival in Palestine there is no record and who left the country during the year : and of persons who were deported.	146
XV	NUMBER OF TRAVELLERS REMAINING ILLEGALLY IN PALESTINE IN EACH MONTH CLASSIFIED BY 'RACE' OR 'NATIONALITY' This table shews the actual movement month by month of the population of illegal immigrants who by illegal settlement abused facilities granted to them as travellers. The negative signs in several compartments in the table indicate that the total population of such persons declined at the period corresponding with those compartments. They do not imply that illegal settlement by means of the abuse of facilities granted to travellers ceased.	147
XVI	VOLUME OF TRAFFIC, IN BOTH DIRECTIONS, THROUGH THE PRESCRIBED PLACE OF ENTRY This table indicates absolutely and relatively the volume of traffic in both directions through the prescribed places of entry into Palestine.	147

*The census figure for this group indicates persons gainfully occupied in a variety of miscellaneous industries and occupations not included under other headings. The migration figures are dominated by the general labourers. These labourers will be, on absorption, distributed over many of the industries classified under other heads, but clearly only a small proportion will be associated with the industries covered by this group of the census classification. A comparison of the figures of immigration with those of the 1931 census would therefore be misleading. The distribution of the general labourers among the manufacturing and construction industries would raise the percentages given. For instance a number of labourers must have been absorbed into the building industry, a number that might be anything up to three times the immigration figure given for that industry.

† Public officers etc., in the classification of immigrants in 1932 were included under the head of clerical service. The correct allocation would raise the total of the public officers group by (perhaps) as much as one per cent. and lower that of the previous group by perhaps one half per cent.

Nine sheets of the 1 : 100,000 contoured maps have now been issued by the Survey Department and the geology, much of which has already been done, is being imposed on these maps. The question of printing or reproducing for publication on a smaller scale is being considered.

The following are the more important mineral deposits :—

- (a) DEAD SEA Potash, bromine, magnesium chloride : quantities unlimited.
- (b) JEBEL USDUM AREA Petroleum : quantity unknown.
Bitumen : known deposits limited.
Salt : quantity unlimited, partly worked.
Gypsum (anhydrite) : quantity large.

SECTION XII METEOROLOGICAL OBSERVATIONS

CLIMATE OF PALESTINE

The climate of Palestine is affected by the deserts of Arabia and Nubia to the East and South; by temperate breezes on the west which bring rain from the south west; and by the somewhat cooler conditions which obtain in the mountains of the Lebanon to the north. It is also varied by the diverse topographical conditions. To the south there are wide expanses of desert and sand dunes. The rest of the country falls rationally into three longitudinal zones—the maritime plain, which is comparatively warm in winter and humid in summer; the hill areas of the central plateau which are cold in winter and have a drier atmosphere; and the Jordan valley, which has a high air pressure and is warm in winter and oppressively hot during summer. During certain periods the east wind, known as the "Khamisin" blows for several days at a time and has a decidedly dessicating effect. Snowfall occurs occasionally in the higher parts of the hill areas. Frost is rare and is not usually a serious factor though cases of damage to horticultural and vegetable crops sometimes occur. Dew fall is heavy during the summer months. Cloud-bursts, which sometimes occur cause a good deal of soil erosion and damage to crops, orchards, and communications.

Rainfall is of vital importance and any reduction in the annual fall arouses concern for the prospects of agriculture and water conservation generally. The rainfalls in winter and the summer months are entirely cloudless and without rain. The first rains which begin in September and continue through October and November are not generally heavy but are sufficient for ploughing and seeding of winter crops. The principal rains fall during December, January and February. The late rains which fall in March and usually end in April are of importance to the full development of the winter crops and greatly affect the amount of land sown with summer crops which reach maturity after the rainy season has ceased.

IMPORTS

The total value of imports for home consumption in 1936 was £P. 13,979,023, a decrease of £P. 3,874,470 as compared with the preceding year.

The prolonged strike rendered difficult the marketing of home grown products, and this and the increased needs of the growing population were responsible for an increase of about £P. 450,000 in the value of food products imported such as barley, wheat, animals for slaughtering, eggs, butter and fruit; fuel also showed an appreciable rise.

On the other hand, the decline in building activity resulted in reduced imports of building material such as wood, tiles, sanitary ware, cement, iron bars, rods and girders, pipes and fittings, the total reduction being about £P. 1,000,000.

Reduced purchasing power is reflected in the decrease of approximately £P. 1,360,000 in the import of radios, electrical goods, cotton piece goods, woollen tissues, silk tissues, wearing apparel and motor cars, motor trucks and parts. There were noticeable decreases also in imports of machinery (£P. 519,000); cotton silk and woollen yarns (£P. 48,000); drugs and medicines (£P. 33,000); lubricating oil and grease (£P. 30,000); medical appliances (£P. 24,000); coal (£P. 36,000); and prepared wood for citrus cases (£P. 102,000).

The two following tables relating to the imports into Palestine are given hereunder:—

EXPORTS

The value of exports of Palestine produce amounted to £P. 3,625,233 in 1936, a decrease of £P. 590,253 as compared with the previous year.

The decrease was primarily due to decreased exports of oranges and grapefruit, which amounted to £P. 715,402 under 1935, and to decreased exports of other products, such as: soap (£P. 25,600), wearing apparel of all kinds (£P. 16,000), cakes of all sorts for feeding animals (£P. 7,400), olive oil (£P. 6,500) and socks and stockings (£P. 3,500).

Exports of certain locally manufactured articles showed an increase of approximately £P. 190,000 over 1935, the increase being chiefly in respect of hides and skins (£P. 65,000), potash (£P. 52,600), edible oils other than olive oil (£P. 27,000), cotton yarn and thread (£P. 17,600), bromine (£P. 16,300), confectionery (£P. 8,000) and essences of all kinds (£P. 7,300).

The following tables relating to exports from Palestine are given hereunder :—

COMMERCE AND INDUSTRY

A number of new factories were established during 1936, among them being factories for the production of milled rice and rice products, razor blades, plate glass, mirrors, flour, bakery products, glass tiles, adhesive dressings, tricotage articles, carbonic acid and insulated electric wire.

There was considerable development in the manufacture of products of the new factories and also in pharmaceutical products. The production of beer was started in the latter part of 1935, and the output for 1936 was 1,954,786 litres.

Some branches of industry showed negligible changes in production. Thus, the output of tobacco factories increased from 908,128 kilos in 1935 to 920,479 kilos in 1936; methylated spirits from 593,307 kilos to 604,398 kilos; while that of salt decreased from 10,376 tons to 9,148 tons; and matches from 221,275 gross to 217,433 gross of boxes. Factories engaged in the extraction of oil showed little change from the previous year; the total imports of copra, linseed, sesame and sunflower seed, shelled groundnuts and other seeds, beans and nuts for extracting oil were 22,660 tons valued at £P. 248,420 in 1936, as compared with 23,493 tons valued at £P. 208,700 in 1935.

Generally speaking, however, the disturbed conditions are reflected in the reduced outputs in almost all other branches. During 1936, 154,000 tons of cement were manufactured as against 187,000 tons in 1935. Production of wine decreased from 2,619,980 litres in 1935 to 2,257,556 litres in 1936; that of cognac from 295,539 litres (of alcohol) in 1935 to 187,593 litres (of alcohol) in 1936. The decreased imports of yarns indicate reduced production in factories manufacturing textile articles, hosiery, sweaters, bathing costumes and other knitted wearing apparel.

Total	1,679,488	205,858	1,137,208	156,370

(It should be noted that exports of cotton yarns and thread increased in value from £P. 1,678 in 1935 to £P. 19,298 in 1936).

Imports of wood for furniture declined from 7,237M³ valued at £P. 29,194 in 1935 to 3,459M³ valued at £P. 13,532 in 1936 which would indicate a decrease in the manufacture of furniture.

BALANCE OF COMMODITY TRADE —

The "adverse" balance of the visible commodity trade of Palestine in 1936 at £P. 9,711,497 was much lower than in 1935 when it was £P. 13,337,336, the reduction being £P. 3,625,839. (The balance of commodity trade is obtained by adding together the exports of Palestinian products and the re-exports of commodities previously imported for home consumption, and then deducting their sum from the imports.) The figures are as follows :—

BALANCE OF COMMODITY TRADE
1935 and 1936

TOURIST TRADE —

The tourist trade of Palestine, which had shown a continuous expansion since 1931, suffered a severe set-back during 1936, the number of travellers entering the country in that year declining by about 50 per cent. as compared with 1935, and reaching approximately the 1931 level. This adversely affected many branches of trade, which subsist principally on the tourist traffic, such as hotels, sale of curios, travel bureaus, and entertainments.

The following table shows the number of travellers recorded as entering Palestine each year since 1931 :—

Year	Number of travellers
1931	54,764
1932	63,253
1933	79,833
1934	91,823
1935	106,823
1936	56,665

REGISTERED COMPANIES —

In 1936, 167 local companies were registered with an authorized capital of £P. 1,046,464 as compared with 277 local companies with a total capital of £P. 3,110,722 registered during 1935. In addition, 16 foreign companies were registered in 1936, as compared with 21 in 1935.

Among the newly registered companies there were 31 with an authorized capital of £P. 10,000 and over, representing about 68 per cent. of the total invested capital. The following table shows the number and the authorized capital of these companies :—

The 1936 registration included one banking house and 14 institutions for the acquisition of land and property and their development. The remaining enterprises were industrial, shipping and transport, insurance, hotels and firms engaged in general trading.

Fifty one companies increased their share capital from £P. 1,068,111 to £P. 1,900,383 during the year under review, while in 1935, 54 companies increased their capital from £P. 1,431,122 to £P. 3,343,547.

The following represent the largest capital increases during 1936 :—

PROTESTED BILLS —

In 1936 the difficulties of debtors occasioned by the international situation towards the end of 1935 were increased by the strike. Protested bills were especially numerous in the second quarter, and although there was a decline in the last four months, the year's total of protested bills for the four chief towns of Palestine was higher by 39 per cent. in 1936 at 10,111 as compared with 7,264 in 1935.

The following table shows the total number of bills protested each month in Jaffa, Jerusalem, Haifa and Tel Aviv during 1935 and 1936 :

BANKRUPTCIES —

Seven Winding-Up-Orders were issued in 1936, and according to the Statements of Affairs submitted by the debtors, their aggregate estimated assets were £P. 43,793 and their aggregate liabilities (including those to preferential creditors) were £P. 138,993. Among these debtors, by far the largest was the Phoenix Insurance Co., with estimated assets of £P. 24,232 and estimated liabilities of £P. 113,698.

BUILDING ACTIVITY —

There was a great decline in the building activity in 1936 which was only partly compensated or by the erection of co-operative buildings in settlements and suburbs, and of warehouses, offices and shops in the reclaimed area in Haifa.

The floor area of new buildings authorized in the four principal towns and the approximate money invested in them, 1931 to 1936, is given in the following table :—

*Figures for Jerusalem and Jaffa are converted from the cubic metres in which they were originally given, by dividing by 3.5 metres, taken as the average height of rooms.

The total for 1936 of 745,053 square metres represents a reduction of about 39 per cent. as compared with 1,214,302 squares metres for the year 1935.

The following table shows the serious decline in the imports of building materials during 1936 as compared with 1935 :—

*The " year of crop " is the year in which the tobacco is planted. Thus the crop of 1935 represents tobacco planted in 1935 and registered in 1936.

†The cultivation of heisheh is permitted in the Beersheba district only and is uncontrolled. Crops of heisheh are therefore not registered.

No records of plantation were taken for the year 1925 as plantation for that year had commenced before the promulgation of the Tobacco Ordinance in May 1925. The total crop, including tobacco, tombac and heisheh for 1925, was 678,179 kilos.

The decrease in the 1935 crop as compared with that of 1934, is mainly attributable to the restriction of tobacco growing in the Samaria district namely, Nablus, Jenin and Tulkarm.
Prices obtained by growers for their 1935 crop compared favourably with prices fetched in preceding years.
The total imports of unmanufactured and manufactured tobacco during the last five years were as follows :—

Rock salt is obtained by quarrying at Jebel Usdum at the south end of the Dead Sea, and other salt is obtained by evaporation at Athlit and at the Dead Sea.

These vehicles subsequently have to be relicensed after each year's use. The difference between the figures for "Registered" and "Licensed" represents the number of motor vehicles in the country not actually in use and unlicensed.

INSURANCE OF LETTERS

Letters may be insured at any post office for any place in Palestine or abroad which is admitted to the insured service. The maximum amount for which a letter may be insured in the inland service is £P. 120 but in the case of letters for abroad the insured value varies according to the country of destination. A letter may not be insured for an amount exceeding the real value of the contents and the cost of packing.

The letters to which the insurance system is applicable are those which contain valuable paper (bank notes, currency notes, bonds, coupons, securities, etc.) or valuable documents (plans, estimates, contracts etc.). Post-cards, packets of printed papers or commercial papers, sample packets or letters which contain articles other than those mentioned above cannot be insured. An object of value which cannot be sent in an insured letter may be sent generally either in an insured box (foreign service only) or an insured parcel.

A letter for insurance must be presented at the counter of a post office. It must not be dropped into a letter box or handed to a postman.

Every letter tendered for insurance must be enclosed in a strong cover made up in one piece, which must be securely fastened by means of identical seals in fine wax, with spaces between, reproducing a private mark, and affixed in sufficient number to hold down all the folds of the envelope. An envelope with a black or coloured border or a transparent panel must not be used. The make-up of every letter must be such that its contents cannot be got at without external and visible damage to the envelope or its seals.

Space must be left between the postage stamps used for prepayment, and between the postal labels, if any, so that they cannot serve to hide injuries to the envelope. They must not be folded over the two sides of the envelope so as to cover an edge. No labels, except those of the postal service, may be affixed. If the packet is tied round with string or tape, a seal must be placed on the ends where they are tied.

In the case of an envelope with a seam down the middle, the seam should be secured with seals placed not more than 8 centimetres apart.

A letter which, although addressed to a country or place to which the insurance system does not extend, has been irregularly insured, will be returned to the sender.

INSURED BOX SERVICE (FOREIGN ONLY)

Articles of gold and silver, precious stones, jewellery and other articles of a like nature which are prohibited from transmission in insured letters, may generally be sent in the letter mails as insured boxes.

An insured box must not exceed 1 kilogramme in weight or measure more than 30 centimetres in breadth and 10 centimetres in depth. The sides of the wooden box must be at least 8 millimetres thick.

The box must be tied round cross-wise with a single strong string (not two or more pieces joined together), the two ends of the string being held firmly together under a seal of fine wax bearing a private mark. All seals on the four sides of the packet must be identical with that used for sealing the ends of the string.

The boxes must not be wrapped in paper.

Insured boxes are subject to the customs regulations and must be accompanied by the appropriate forms, which should be most carefully prepared.

No box can be insured for more than its actual value or the limit of insurance allowed.

Postage and insurance fee must be fully prepaid.

The rate of postage is 8 mils per 50 grammes with a minimum charge of 40 mils. The fee for insurance and the limits of insurance are the same as for insured letters to places abroad.

An advice of delivery of an insured box may be obtained on payment of a fee of 13 mils either at the time of posting or subsequently.

SMALL PACKETS

The small packet service is intended to afford facilities for the transmission of small articles of merchandise in the letter mails to certain foreign countries.

The rate of postage is 9 mils per 50 grammes, with a minimum charge of 30 mils. The postage must be fully prepaid.

The maximum dimensions are 45 centimetres in length, 20 centimetres in breadth and 10 centimetres in depth or, if in the form of a roll, 45 centimetres in length and 15 centimetres in diameter.

The limit of weight is 1 kilogramme. Dutiable articles may be enclosed in small packets but, otherwise the prohibitions applicable to the letter post apply also to the service of small packets. In addition, the following are specially excluded from transmission in small packets :—

Letters, notes or documents having the character of actual and personal correspondence (this prohibition does not apply to open invoices reduced to the simplest form, the address of the article, and the sender's address); coin; bank notes; currency notes; negotiable instruments payable to bearer; platinum, gold or silver, manufactured or not; precious stones; jewels and other valuable articles; postage stamps, whether obliterated or not.

Small packets containing dutiable articles are subject to the customs regulations in the country of destination; and a postal fee for customs clearance may be charged on each packet on which customs duty is levied. The fee for the clearance of such packets entering Palestine is fixed at 20 mils.

Small packets are subject to the regulations laid down for samples of merchandise as regards form, make-up and packing (e.g. they must be sent in such a manner as to be easy of examination). In addition, the name and address of the sender must be shown on the outside of the packet; and each packet should be conspicuously marked "Small Packet" in the left-hand top corner.

A green label, giving particulars of the contents for customs purposes, must be affixed to each packet. In addition, if the country of destination so requires, one or more ordinary customs declaration forms must be enclosed in or attached to the packet.

Small packets may be posted in a posting box or handed over the counter. They may be registered, but not insured.

CASH-ON-DELIVERY SERVICE

INLAND

An inland "Cash-on-delivery" parcel and packet service is in operation. Cash-on-delivery parcels and packets may be posted at any post office in Palestine for delivery at any post office in Palestine.

FEES PAYABLE

On every inland cash-on-delivery parcel or packet a special cash-on-delivery fee is charged in addition to the ordinary postage and registration or insurance fee where applicable. The amount of the cash-on-delivery fee varies according to the amount of the trade charge, as follows :—

FOREIGN

A "Cash-on-delivery" parcel service with the United Kingdom and Egypt is in operation. Cash-on-delivery parcels may be posted at all post offices in Palestine.

FEES PAYABLE

The sender must prepay, by means of postage stamps affixed to the despatch note, a special cash-on-delivery fee at the rate of 1 per cent. of the amount of the trade charge with a minimum of 10 mils, plus a fixed "posting fee" of 10 mils per parcel. These fees are additional to the ordinary postage and other charges.

The maximum trade charge per parcel is £P. 40.

A delivery fee of 15 mils is collected from the addressee of a "Cash-on-delivery" parcel in addition to the amount of the trade charge.

PARCEL POST

CUSTOMS DECLARATION

One or more customs declarations must accompany every outgoing foreign parcel. The number of copies varies according to the country of destination.

UNDELIVERED PARCELS

Undelivered parcels are disposed of according to the sender's instructions, which should be furnished on the reverse side of the despatch note and on the cover of the parcel. When such instructions are not furnished, the parcel is returned to origin at the expiration of one month from the date of receipt in Palestine.

MAKE-UP

Parcels addressed to foreign countries should generally be packed in tin, canvas, linen or similar material, with due regard to the length of journey, conditions of transit, climate, etc.—not merely in paper or cardboard—and in a manner calculated adequately to protect the contents from damage through contact with other parcels.

INSURANCE (INLAND & FOREIGN)

Parcels may be insured for delivery at any post office in Palestine, or to any country which undertakes such service.

The maximum amount for which a parcel can be insured varies according to the country of destination, but in no case may it exceed £P. 120. A parcel may not be insured for an amount exceeding the real value of the contents and the cost of packing.

Insured parcels must be very strongly packed and sealed in accordance with the regulations.

The fee for insurance, including registration but in addition to the ordinary postage, is 20 mils for the first £P. 12 or part thereof of the insured value and 7 mils for each additional £P. 12 or part thereof.

Every insured parcel containing coin or bullion, watches, precious stones, jewellery, or any article of gold or silver, must be enclosed in a strong box or case (measuring, if the contents are jewellery exceeding £P. 100 in value, at least 105 centimetres in length and girth combined), must be sewn up, or otherwise fastened, in a wrapper of linen, canvas, strong paper, or other substantial material and must have the address written on its actual covering. The seals must be placed along the edges of each join or loose flap at distances of not more than 8 centimetres apart.

Parcels may not exceed 10 kilogrammes in weight. For many countries the maximum weight allowed is 5 kilogrammes.

The maximum length allowed is 105 centimetres, and the maximum length and girth combined, 180 centimetres.

An advice of delivery of an insured parcel may be obtained, either at the time of posting or subsequently, on payment of the sum of 10 mils in the case of an inland parcel and 13 mils in the case of a foreign parcel.

CHARGES FOR CALL OFFICE CALLS

The charge for the use of a call office, including communication with any local subscriber, is 10 mils for each 3 minutes or less during the day and for each 6 minutes or less at night (6 p.m. to 7 a.m.).
Trunk calls may be made from all call offices. The charge for use of the trunk, is payable in addition to the call office fee except when the trunk charge is less than 10 mils.
The charge is payable at the time of booking the call.

TRUNK LINES

The telephone trunk lines which connect the various telephone exchanges throughout Palestine can be used by callers from all public call boxes, as well as by subscribers connected with telephone exchanges.
The unit period of conversation is 3 minutes (6 minutes between 6 p.m. and 7 a.m.) from the time when the caller or subscriber has been informed that the connexion is completed ; but any caller, by prepaying a double fee in advance, may secure, on demand at the end of the first period, the option of extending a unit call to double time.

An "Urgent" trunk call service is available for all public subscribers and at telephone call offices. Such calls, which take precedence over all ordinary trunk calls already booked and not completed, are charged for at double the ordinary rates.

When the option of extending a call has been asked for by a caller and the call expires within the unit period, the fee for the second period will be refunded.

No person is entitled to use a trunk line continuously for more than six minutes during the day or twelve minutes at night, but exceptions may be made when the trunk is available for a further period.

No charge is made for the use of a trunk line when the person in attendance at the originating telephone is not placed in a position to converse with some person attending at the telephone of the distant subscriber.

When a call is cancelled after the attention of the distant subscriber has been obtained, and effective communication is practicable but not established through inattention on the part of the calling subscriber, the full cost for a unit conversation is charged.

A telephone subscriber is required to deposit with the Postmaster General a minimum sum of £P. 1,500 mils as a trunk call account guarantee deposit, or if the Postmaster General so desires, a sum equal to two-thirds of the amount of the subscriber's average quarterly account for trunk calls. The sum so deposited is returnable to the subscriber, less the amount of any accounts due to the Postmaster General, when the subscriber relinquishes the telephone.

OVERSEAS TELEPHONE SERVICE

The overseas telephone service is available to all subscribers who are entitled to trunk facilities and, without restriction, at any post office or postal agency call office.

The hours of service vary according to the country and the season but calls for completion during the hours of service may be booked at any time.

The charges for trunk calls to Iraq are computed on the actual number of minutes spoken, subject always to a minimum charge as for 3 minutes.

A part of a minute after the first 3 minutes is considered as 1 minute.

The schedule shows the charges for calls from the various Palestine zones to the Iraq zones of 3 to 12 minutes duration passed during normal hours (7 a.m. to 8 p.m.) and night hours 8 p.m. to 7 a.m.

The charges for "Urgent" calls are double the rates shown.

An additional charge of 10 mils will be made in respect of each call originated at a public call office.

The wage rates shown in respect of Jewish building workers represent union rates and are based on eight hours' work. The prevailing hours of work of Arab building workers are 9—10 hours per day.

The tariffs of the unions of Jewish building workers are usually based on the division of the workers into three classes according to skill and experience. The term "skilled" workers used in the table corresponds to 1st and 2nd class work; the term "semi-skilled" workers corresponds to the 3rd class of the union scale.

The following daily wage rates were paid to Jewish non-union workers in November, 1936 :

				mils
Skilled building workers	400-500
Semi-skilled building workers	300
Unskilled building labourers	250-300

BANKS AND CREDIT CO-OPERATIVE SOCIETIES

Banking facilities are supplied in Palestine by at least three groups of financial institutions, known respectively as foreign banks, local banks and credit co-operative societies. There is no fundamental difference as far as principle and type of business is concerned between foreign and local banks, though the former have a greater volume of business. The credit co-operative societies, however, differ from banks in principle and in business practice. Nevertheless, as all these institutions are engaged in the same basic activities of accepting money on deposit and granting credit, their activities are dealt with in this section.

BANKS.

The two largest banks in Palestine are Barclays Bank (Dominion, Colonial & Overseas) and the Anglo-Palestine Bank, Ltd., both of which maintain branches in the more important business centres of the country. These two institutions, together with the Ottoman Bank, the Banco di Roma, the Holland Bank Union and the Polish Guardian Bank, Ltd., are the six foreign banks operating in the country.

In addition to the six foreign banks there are no fewer than sixty-eight local banks. These are smaller institutions, most of them established during the prosperous period from 1932 to 1935. The local banks vary considerably in size and importance; quite a number of them are still in the early stages of their development, while others have expanded and opened branches elsewhere in Palestine.

In accordance with the Banking (Amendment and Further Provisions) Ordinance, 1936, banks are now required to submit to the Treasurer "not later than twenty-one days after the last day of each month a statement showing the assets and liabilities of the company at the close of business on the last day of the preceding month".

The statistics published in the following table are based on the figures compiled from these statements as at the 31st December, 1936.

‡Foreign banks only.

In accordance with the Banking Ordinance, 1936, banks are required to make semi-annual statements showing the particulars of the credit granted by them in the form of advances and/or bills discounted as at the 31st March and 30th September of each year. The table below shows the distribution of bank loans by categories as at 30th September, 1936.

On that date the grand total of bank funds loaned to customers by way of advances and/or bills discounted was £P. 9,676,845, of which £P. 2,463,801 was discounted bills and £P. 7,213,044 was advances to customers. The number of customers in each of the twenty-six categories, and the aggregate loans in each category, were as given in the following table, which is of importance as showing how much of the banks' money is invested in each of the types of enterprise enumerated in the first column of the table. It may be noted that the largest sums are invested in the citrus industry and in loans to wholesale merchants. The table shows that there were in all 50,383 debtors of the banks, so that the average loan was £P. 192.

†The number of customers in this table differs slightly from the number of customers mentioned in the preceding table, given as 50,383. The reason is that, in the preceding table showing the distribution by categories, individuals who obtained more than one loan but for different purposes have been counted more than once, while in this table every individual customer was counted only once.

CREDIT CO-OPERATIVE SOCIETIES.

There are registered with the Registrar of Co-operative Societies under the Co-operative Societies Ordinances of 1920 and 1933 over one hundred Jewish credit co-operative societies, about 62 Arab and 2 "Other" societies, scattered throughout the country. Among these are seventeen larger Jewish societies which have also registered under the Companies Ordinance, thus becoming subject to the Banking (Amendment and Further Provisions) Ordinance, 1936, and therefore, required by law to submit, similarly to banks, monthly statements of their assets and liabilities.

Beginning with April 1936, the credit co-operative societies, on the request of the Registrar, agreed to submit voluntary, monthly statements of their assets and liabilities as at the end of each month. During the last eight months of 1936, 93 Jewish, credit co-operative societies, have made regular monthly returns to the Registrar. Thirty-five of these societies located in towns are referred to as "urban", while the remaining 58, located in agricultural areas, are referred to as "rural". The statistics of credit co-operative as presented in the following table are based on the monthly returns of assets and liabilities of the 93 Jewish societies as at 31st December, 1936.
